Introduction

Definition, purpose and disclaimer

The Land Availability Assessment (LAA) identifies a supply of sites in Medway which is suitable, available and achievable for housing and economic land up to 2041.

An up-to-date assessment of land availability is needed as part of the plan-making process. The LAA supersedes the 2019 Strategic Land Availability Assessment, which did not provide a source of sites.

The area selected for the LAA is the Medway unitary authority area.

The 2023 Interim Report set out the LAA process and described how sites were identified and considered in an initial survey. The appendices included large scale maps and site-specific information.

The LAA does not determine whether a site should be allocated for development. Rather, the LAA provides information on the range of sites to meet Medway's development needs. Following a site selection process, the new Local Plan will show which sites are allocated for development.

All planning applications will continue to be determined in accordance with the development plan and material planning considerations, including the National Planning Policy Framework (NPPF).

The LAA is based on the best information available at the time of writing.

Medway Council does not accept liability for any inaccuracies or omissions in the LAA. In particular, applicants must not rely on the LAA to identify constraints.

Process

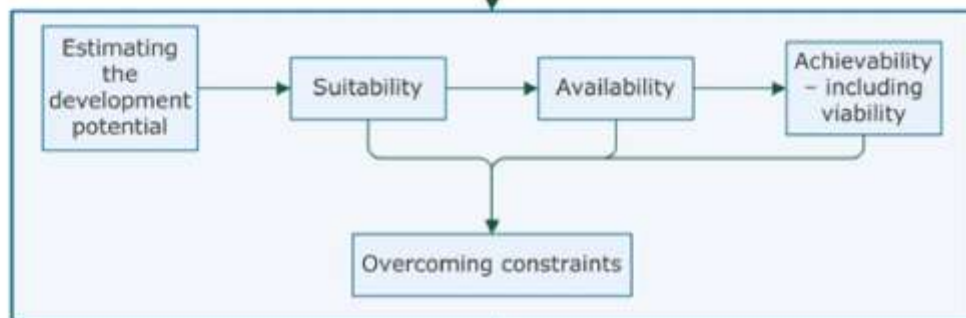

The LAA has been prepared in line with the relevant Planning Practice Guidance (PPG).^{1, 2, 3}

Figure 1 shows a flowchart of the LAA process in five stages.

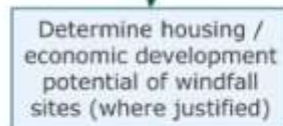

Stage 1 - Site / broad location identification

Stage 2 - Site / broad location assessment

Stage 3 - Windfall assessment

Stage 4 - Assessment review

Stage 5 - Final evidence base

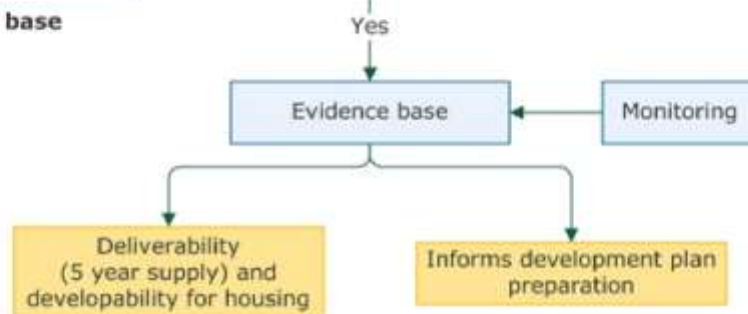

Figure 1: LAA flowchart (reproduced from the relevant PPG)

1 Stage 1 – Site Identification

1.1 Overview

- 1.1.1 Medway Council issued a ‘call for sites’ between November 2022 and February 2023. A call for sites is an important information-gathering exercise as part of the LAA. The call for sites was for all land uses.
- 1.1.2 Submissions through the call for sites were given an automated ‘form submission ID’. The table at Appendix A shows the corresponding LAA Site ID for these sites.
- 1.1.3 In total, 146 valid submissions were received through the call for sites. All valid submissions are presented at Appendix B, which includes bookmarks by LAA Site ID.
- 1.1.4 The LAA has taken a proactive and comprehensive approach in identifying as wide a range of sites as possible. In addition to the call for sites, the following sources have been used:
- Medway Local Plan 2003 (unimplemented site allocations)
 - Brownfield Land Register
 - Development briefs
 - Land Registry (land in Medway Council’s ownership)
 - Emerging neighbourhood plans
 - Planning applications (unimplemented consents, refused, withdrawn and expired as at 31 March 2023)
 - Local Development Order for Innovation Park Medway
 - Vacant and derelict land and buildings
- 1.1.5 A total of 462 sites were identified, with 15 new sites added after the Regulation 18 (2023 consultation), although in some instances alternative submissions for the same site were received through the call for sites.
- 1.1.6 Each site has been assigned an identification reference for use in the LAA. This is based on an abbreviation of the electoral ward and its location relative to other sites for ease of navigation on a map.
- 1.1.7 All 462 sites are shown on a map at Appendix C.

1.2 Initial survey

- 1.2.1 In line with the relevant PPG, 103 sites that would not be capable of delivering five or more dwellings, or economic development on sites of 0.25 hectares (or 500 square metres of floorspace) were screened out and did not progress to Stage 2.
- 1.2.2 The initial survey considered some of the policies in footnote 7 of the NPPF which sets out the areas that would provide strong reasons for restricting the overall scale, type or distribution of development.⁴ The initial survey is based on an 'overlap analysis' in a Geographic Information System to show the extent (proportion) of each site covered by the relevant designations.
- 1.2.3 The initial survey is proportionate, given the high number of sites identified.
- 1.2.4 An initial survey of each site is presented at Appendix D, which includes bookmarks by LAA Site ID.

2 Stage 2 – Site Assessment

2.1 Overview

- 2.1.1 Stage 2 involved estimating the development potential and an assessment as to the suitability, availability and achievability of each site. This involved a planning officer's judgement about overcoming site-specific constraints.
- 2.1.2 Each site assessment is presented at Appendix E, which includes bookmarks by LAA Site ID.

2.2 Estimating the development potential

- 2.2.1 The relevant PPG states that it is important to make the most efficient use of land in line with policies set out in the NPPF. Moreover, it is important to provide for the full range of local housing needs.
- 2.2.2 A site-specific, desktop estimated residential yield was calculated based on the net site area multiplied by an appropriate residential typology.
- 2.2.3 The gross site area (hectares) was calculated in a Geographic Information System. The net site area (hectares) was based on the gross to net ratios in Table 1.

Table 1: Gross to Net Ratios

Gross site area (Ha)	Gross to net ratio
Less than 0.4	100%
0.4 to 2	82.5%
More than 2	62.5%

- 2.2.4 A range of residential typologies were applied based on the site-specific context, including:
- mews houses;
 - town houses;
 - maisonettes;
 - linear apartment blocks; and
 - mixed-use apartment blocks.
- 2.2.5 The typologies are presented at Appendix F; this is an extract from the 2019 'Stood Town Centre Masterplan' by Allies and Morrison on behalf of Medway Council. For each typology, a midpoint density (dwellings per hectare) was applied.
- 2.2.6 A density of 30 dwellings per hectare was applied to sites in suburban or rural locations.
- 2.2.7 Estimating the development potential enabled a comparison with information received from site promoters to ensure the most efficient use of land; however, latter stages of work were largely based on more detailed information received from site promoters.

2.3 Suitability

- 2.3.1 The initial survey at Stage 1, i.e. the extent (proportion) covered by Habitats sites, Ancient Woodland and flood risk zones, provided a foundation for the assessment of suitability.
- 2.3.2 The assessment of suitability considered the site's status as consented development, previously developed land and best and most versatile agricultural land.
- 2.3.3 The relevant PPG states that sites with planning permission can generally be considered suitable for development.
- 2.3.4 The NPPF states that local plans should give priority to previously developed land where it is necessary to release Green Belt land for development. This was an important consideration in the assessment of suitability, following the Stage 4 Assessment Review and ongoing engagement with Gravesham Borough Council.
- 2.3.5 The relevant PPG states that other factors could inform the assessment of suitability, such as an emerging site allocation. The function of the Green Belt would be compromised should Gravesham Borough Council allocate Green Belt land immediately to the west of the administrative border. This was an important consideration for three adjoining Green Belt sites to the west of Stood (SNF1, SNF2 and SR5).
- 2.3.6 There is ongoing engagement with Natural England concerning the potential loss of best and most versatile agricultural land, i.e. land in grades 1, 2 and 3a of the Agricultural Land Classification. This was based on an 'overlap analysis' in a Geographic Information System to show the extent (proportion) of each site covered grades 1, 2 and 3; spatial data for Medway as a whole for sub-grade 3a is unavailable.
- 2.3.7 The assessment of suitability also considered whether the site is well-served by existing public transport and its potential to contribute to the Council's regeneration agenda.
- 2.3.8 The integration of the LAA with the Sustainability Appraisal (SA) in plan-making is critical. To prevent duplication of assessment criteria, the Interim SA site assessments, i.e. pre- and post-mitigation scoring against 12 objectives, were also considered in the assessment of suitability.
- 2.3.9 Planning officers invited some site promoters to discuss the suitability of their sites to inform a judgement about overcoming site-specific constraints.

2.4 Availability

- 2.4.1 The relevant PPG states that a site can be considered available for development, when, on the best information available, there is confidence that there are no legal or ownership impediments to development. For example, land controlled by a developer or landowner who has expressed an intention to develop may be considered available. This information was collected during the call for sites, while many sites continued to be promoted through the Regulation 18a and 18b consultations.

- 2.4.2 The relevant PPG also states that planning permission can be an indication of availability. The assessment of availability considered a site with planning permission to be available.
- 2.4.3 The Interim LAA invited more information on the availability status of 109 sites. Most of these sites are located in town centres and were identified from development briefs, some of which contained conceptual plans. Other sites were identified from emerging neighbourhood plans, planning applications (refused, withdrawn and expired as at 31 March 2023) and vacant and derelict land and buildings. Such sites were deemed unavailable unless their availability was subsequently confirmed.

2.5 Achievability

- 2.5.1 The relevant PPG states that a site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time. This is essentially a judgement about the economic viability of a site, and the capacity of the developer to complete and let or sell the development over a certain period.
- 2.5.2 The assessment of achievability considered each site's planning status and what action would be required to overcome constraints. Sites have been deemed achievable and viable unless their constraints, such as contaminated land, are so significant that they would prevent development.
- 2.5.3 Planning officers invited some site promoters to discuss the achievability of their sites to inform a judgement.
- 2.5.4 Crucially, the three adjoining Green Belt sites to the west of Stood (SNF1, SNF2 and SR5) could come forward as independent developments, regardless of Gravesham Borough Council's emerging local plan.

2.6 Timescale for delivery

- 2.6.1 The relevant PPG states that the suitability, availability and achievability should inform a judgement as to whether a site can be considered deliverable within the next five years, or developable over a longer period. This may include indicative lead-in times and build-out rates for the development of different scales of sites.
- 2.6.2 The 2024 Lichfields 'Start to Finish' (Third Edition) report provides context, considerations and benchmarks for housing trajectories. However, as noted in the report, every site is different. The relevant PPG states that the advice of planning agents will be important to help determine site-specific lead-in times and build-out rates.
- 2.6.3 In November 2024, the Council invited planning agents acting on all 'reasonable alternative' sites identified in the Interim SA to set out minimum and maximum annual housing trajectories, having regard to outlets. The Council also invited the same planning agents to review their call for sites submissions to identify any changes to the proposed developments (i.e. land uses and quantum), land ownership, market interest and to provide any other supporting information.

- 2.6.4 The timescales for delivery – derived from the final housing trajectory – have been determined for sites deemed suitable, available and achievable only.

3 Stage 3 – Windfall Assessment

3.1 Overview

- 3.1.1 The NPPF defines ‘windfall sites’ as “Sites not specifically identified in the development plan.
- 3.1.2 The relevant PPG states that a windfall allowance may be justified as part of the housing supply where there is compelling evidence.
- 3.1.3 The Council’s monitoring of completions from windfalls over 10 years includes both greenfield and previously developed land, but excludes garden areas or sites that have been identified in planning documents.
- 3.1.4 The Council’s windfall allowance excludes small sites that were permitted on appeal. The Council’s windfall allowance also excludes large sites, apart from conversions or prior notifications, because the majority are likely to have been identified at Stage 1 of the LAA.

3.2 Small site completions

- 3.2.1 Small sites comprise fewer than five net dwellings. These sites are neither allocated nor identified within planning documents, apart from small sites that were permitted on appeal.
- 3.2.2 Table 2 shows small site completions over the last decade, excluding small sites that were permitted on appeal.

Table 2: Small Site Completions

Year	Small sites (Excluding permissions on appeal)
2014/15	43
2015/16	73
2016/17	81
2017/18	60
2018/19	88
2019/20	57
2020/21	78
2021/22	64
2022/23	46
2023/24	29
<i>Total</i>	<i>619</i>
<i>Average</i>	<i>61.9</i>

- 3.2.3 Table 2 shows that an average of 61.9 dwellings have been completed annually on small sites, excluding small sites that were permitted on appeal, over the last decade.

3.3 Large site completions from conversions or prior notifications

- 3.3.1 Large sites comprise five or more net dwellings.
- 3.3.2 Large site completions from conversions or prior notifications are unlikely to have been identified at Stage 1 of the LAA. All other large sites are likely to have been identified at Stage 1 of the LAA; such sites have been excluded from the windfall allowance.
- 3.3.3 Table 3 shows large site completions from conversions and prior notifications over the last decade.

Table 3: Large Site Completions from Conversions or Prior Notifications

Year	Large site completions from conversions	Large site completions from prior notifications
2014/15	0	0
2015/16	11	7
2016/17	38	35
2017/18	14	0
2018/19	57	10
2019/20	54	34
2020/21	8	0
2021/22	6	5
2022/23	26	60
2023/24	32	308
<i>Total</i>	<i>246</i>	<i>459</i>
<i>Average</i>	<i>24.6</i>	<i>45.9</i>

- 3.3.4 Table 3 shows that an average of 24.6 and 45.9 dwellings have been completed annually on large sites from conversions and prior notifications respectively over the last decade.

3.4 Windfall allowance

- 3.4.1 As show in Table 4, the Council's windfall allowance is based on a:
- 10-year average of small site completions;
 - 10-year average of large site completions from conversions; and
 - 10-year average of large site completions from prior notifications.

Table 4: Windfall Allowance

10-year average of small site completions	61.9
10-year average of large site completions from conversions	24.6
10-year average of large site completions from prior notifications	45.9
<i>Total windfall allowance</i>	<i>132.4</i>

- 3.4.2 Table 4 shows the total windfall allowance of 132 dwellings per annum.

- 3.4.3 The windfall allowance will be applied from year four, i.e. 2029/30; any sites delivering before year four are likely to have been permitted and therefore counted in the housing supply.
- 3.4.4 Therefore, the total windfall allowance for the period 2029/30 to 2040/41 is 1,584 dwellings.

4 Stage 4 – Assessment Review

4.1 Overview

- 4.1.1 Medway's local housing need, derived from the Standard Method, is 1,636 per annum.
- 4.1.2 The 2025 Employment Land Needs Assessment (ELNA) identified the following minimum need for employment floorspace:
- 204,000 sqm of industrial floorspace.
 - 36,500 sqm of office floorspace.

4.2 Regulation 18 (2024)

- 4.2.1 The Regulation 18 (2024) consultation presented three spatial growth options. The third spatial growth option, 'Blended Strategy', was identified as the Council's indicative preferred approach. The Interim SA found that this option is likely to offer the best balance of sustainability considerations to meet Medway's development needs. This option could accommodate up to 23,733 dwellings.
- 4.2.2 The housing trajectory for consented sites reflected the latest Authority Monitoring Report. However, for unconsented sites, indicative lead-in times and build-out rates were applied.
- 4.2.3 The 2024 Lichfields 'Start to Finish' (Third Edition) report provides context, considerations and benchmarks for housing trajectories. As defined in the report, "The overall 'lead-in time' covers stages associated with securing a local plan allocation, going through the 'planning approval period' and 'planning to delivery period', and ending when the first dwelling is completed. The 'build period' commences when the first dwelling is completed, denoting the end of the lead-in time."
- 4.2.4 Table 5 shows the median indicative lead-in times (years) by site size (dwellings).

Table 5: Median Indicative Lead-in Times by Site Size

50-99 dwellings	100-499 dwellings	500-999 dwellings	1,000-1,499 dwellings	1,500-1,999 dwellings	2,000+ dwellings
2.7 years	5.2 years	4 years	5.4 years	5.3 years	6.3 years

Source: Table 3.1 of 2024 Lichfields 'Start to Finish' (Third Edition)⁵

- 4.2.5 The median indicative lead-in times by site size were applied to the housing trajectory.
- 4.2.6 Table 6 shows the median indicative build-out rates (dwellings per annum, (DPH)) by site size (dwellings).

Table 6: Median Indicative Build-out Rates by Site Size

50-99 dwellings	100-499 dwellings	500-999 dwellings	1,000-1,499 dwellings	1,500-1,999 dwellings	2,000+ dwellings
18 dpa	44	68	87	104	136

Source: Table 4.2 of 2024 Lichfields 'Start to Finish' (Third Edition)⁶

- 4.2.7 The median indicative build-out rates by site size were also applied to the housing trajectory.
- 4.2.8 Following the Regulation 18 (2024) consultation, the Council's emerging housing trajectory found that the two largest sites could not be expected to be completed by 2041, specifically Mill Fields (LW8) and Chatham Docks (SM16). This meant 1,130 dwellings would be delivered after 2041, leaving a housing supply shortfall. This was confirmed in responses from planning agents and prompted a return to Stage 2, as shown in the LAA Flowchart at Figure 1.
- 4.2.9 The Interim LAA invited more information on the availability status of 109 sites. Most of these sites are located in town centres and were identified from development briefs, some of which contained conceptual plans. Such sites were deemed unavailable unless their availability was subsequently confirmed. This meant there was limited scope to increase densities of sites located in town centres.
- 4.2.10 In response to the Regulation 18 (2024) consultation, representations on behalf of the Church Commissioners and Esquire Developments set out compelling cases to allocate more land to the east of Ropers Lane, Hoo St Werburgh, and at Lower Rainham respectively. Meanwhile, engagement with Gravesham Borough Council led to the reconsideration of three adjoining Green Belt sites to the west of Stood (SNF1, SNF2 and SR5). These sites were subsequently deemed suitable, available and achievable, and crucially ensured a housing supply surplus.
- 4.2.11 The timescales for delivery – derived from the final housing trajectory – have been determined for sites deemed suitable, available and achievable only.

4.3 Deliverable sites

- 4.3.1 'Deliverable' sites are available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years.
- 4.3.2 84 sites are wholly deliverable, i.e. they would have finished by 2030/31.
- 4.3.3 An additional 40 sites would start delivering by 2030/31.

4.4 Developable sites

- 4.4.1 'Developable' sites are in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged.

- 4.4.2 13 sites are developable, i.e. they would start delivering from 2031/32.

4.5 Overall risk assessment

- 4.5.1 The assessment of achievability considered each site's planning status and what action would be required to overcome constraints. Sites have been deemed achievable and viable unless their constraints are so significant that they would prevent development. However, it is conceivable that the cost to remediate contaminated land, for example, may delay or prevent delivery.
- 4.5.2 The use of median indicative lead-in times and build-out rates is cautious; the 2024 Lichfields 'Start to Finish' (Third Edition) report also sets out upper quartile and maximum data points. Some flatted schemes could deliver much quicker in 'lumps', depending on wider economic factors and the absorption rate of the local market. Conversely, large-scale entirely flatted schemes are susceptible to market downturns.
- 4.5.3 The scale of local housing need, and the different types of homes required, requires a wide distribution of site allocations. The Council's spatial strategy avoids relying on a broad location for deliverable sites.
- 4.5.4 All sites will be subject to annual monitoring, and the Council will work with developers where required. Depending on the outcome of future Housing Delivery Test results, the Council will update its Housing Delivery Test Action Plan and monitor its implementation.
- 4.5.5 It is important to note that the three adjoining Green Belt sites to the west of Stood (SNF1, SNF2 and SR5) could come forward as independent developments, regardless of Gravesham Borough Council's emerging local plan.
- 4.5.6 There is a high level of business occupancy and fragmented land ownership on the Medway City Estate. A comprehensive, collaborative approach will be required, particularly the timely relocation of existing businesses to new employment areas in Medway, such as Kingsnorth. The Frindsbury Peninsula is therefore designated as an 'Opportunity Area'. The Council will produce a Frindsbury Peninsula Planning Framework by 2030/31 to manage the medium to long-term redevelopment, including a riverside strategy, an economic strategy and the delivery of strategic flood risk infrastructure.
- 4.5.7 The funding for infrastructure required early in the plan-period, particularly for off-site highway mitigations, is likely to be challenging. The Council may need to implement interim measures and management plans.

5 Stage 5 – Final Evidence Base

5.1 Housing supply

5.1.1 Table 7 shows all components of housing supply.

Table 7: Components of Housing Supply

Component of housing supply	Dwellings
<i>Total need (15 years x 1,636 p/a)</i>	<i>24,540</i>
Windfall	1,584
Large sites under construction as at March 2024 to be delivered during plan period	1,524
Large sites permitted, but not allocated	128
Small sites permitted (130 less 15% lapse rate)	110
<i>Required yield of allocated sites</i>	<i>21,194</i>
<i>Yield of allocated sites to be delivered during plan period</i>	<i>21,397</i>
<i>Buffer/Surplus</i>	<i>203</i>

5.1.2 Table 7 shows a sufficient housing supply, including a buffer/surplus. The 'Yield of allocated sites to be delivered during plan period' is comprised of sites deemed suitable, available and achievable in the LAA.

5.1.3 A 15% 'lapse rate', i.e. a 15% decrease of small sites with planning permission to allow for non-delivery, has been applied to small sites only. As part of an annual monitoring process, planning officers discount large sites that are unlikely to deliver within the plan period. Therefore, there is no need to apply a lapse rate to large sites. The 15% lapse rate has been informed by a 10-year average lapse rate.

5.1.4 Table 8 shows an annual distribution of the housing supply.

Table 8: Annual Distribution of Housing Supply

		Local housing need	Windfalls	Large sites under construction	Large sites permitted, but not preferred	Consented small sites	Allocated sites	Total supply
Year 1	2026/27	1,636	0	594	103	107	1,206	2,010
Year 2	2027/28	1,636	0	286	17	5	1,584	1,892
Year 3	2028/29	1,636	0	93	0	14	1,395	1,502
Year 4	2029/30	1,636	132	253	8	4	1,939	2,336
Year 5	2030/31	1,636	132	128	0	0	1,918	2,178
	<i>Sub-total with 20% buffer</i>	<i>9,816</i>	<i>264</i>	<i>1,354</i>	<i>128</i>	<i>130</i>	<i>8,042</i>	<i>9,918</i>
Year 6	2031/32	1,636	132	119	0	0	2,251	2,502
Year 7	2032/33	1,636	132	51	0	0	1,885	2,068
Year 8	2033/34	1,636	132	0	0	0	1,750	1,882
Year 9	2034/35	1,636	132	0	0	0	1,232	1,364
Year 10	2035/36	1,636	132	0	0	0	1,334	1,466
	<i>Sub-total</i>	<i>8,180</i>	<i>660</i>	<i>170</i>	<i>0</i>	<i>0</i>	<i>8,452</i>	<i>9,282</i>
Year 11	2036/37	1,636	132	0	0	0	1,023	1,155
Year 12	2037/38	1,636	132	0	0	0	1,288	1,420
Year 13	2038/39	1,636	132	0	0	0	897	1,029
Year 14	2039/40	1,636	132	0	0	0	1,032	1,164
Year 15	2040/41	1,636	132	0	0	0	663	795
	<i>Sub-total less 20%</i>	<i>6,544</i>	<i>660</i>	<i>0</i>	<i>0</i>	<i>0</i>	<i>4,903</i>	<i>5,563</i>
	<i>Grand total</i>	<i>24,540</i>	<i>1,584</i>	<i>1,524</i>	<i>128</i>	<i>110</i>	<i>21,397</i>	<i>24,743</i>

5.1.5 Table 8 confirms a sufficient housing supply.

5.1.6 A site-specific, annual housing trajectory is presented at Appendix G.

5.2 Economic land supply

- 5.2.1 The development pipeline is sufficient to meet the quantum of employment land needs, however there remains a shortage of built stock. The development pipeline is almost entirely led by Kingsnorth and the Isle of Grain, which are among the largest sites for economic growth in the Thames Estuary and the wider region. The Medway Local Plan 2003 included two strategic site allocations at Kingsnorth and the Isle of Grain, i.e. Policy S12 (Kingsnorth) and Policy S13 (Isle of Grain).
- 5.2.2 Policy S12 designated a 219 ha site at Kingsnorth for industrial, storage or distribution and Sui Generis uses (B1c, B2, B8 prior to 1 September 2020). The policy provided for the expansion or relocation of businesses in the urban area.
- 5.2.3 London Medway Commercial Park, located at Kingsnorth, was granted outline planning permission in 2009. There have been many reserved matters applications for the individual plots, such as Plot 1a which was completed in 2019 to accommodate Amazon's distribution warehouse. An 8,925 sqm extension to Damhead Creek Power Station has been implemented, but it is not under construction. More recently, Medway Council's Planning Committee resolved to grant outline planning permission for MedwayOne (MC/21/0979), a 324,450 sqm development of employment floorspace, on the former Kingsnorth Power Station site.
- 5.2.4 Policy S13 designated a 630 ha site on the Isle of Grain for port activities and industrial, storage or distribution and Sui Generis uses (B1c, B2, B8 prior to 1 September 2020). The Isle of Grain site benefits from a railhead and deep-water berths.
- 5.2.5 Grain Business Park was granted outline planning permission (MC/09/1628) in 2009. In 2015, a reserved matters application took account of a revised masterplan which reduced the maximum permitted floorspace to 298,383 sqm. A subsequent reserved matters application was also granted in 2015 for the first phase of 16,770 sqm. The residual permitted floorspace is therefore 282,203 sqm. In February 2020, a Lawful Development Certificate was approved confirming that the outline permission had commenced. The landowner, National Grid, intends to realise the full potential of the Isle of Grain site. However, the Council anticipates less storage and distribution floorspace coming forward due to the remote location. A 'call for sites' submission noted the need to retain a broad range of uses in any site allocation. The Isle of Grain site has been safeguarded under Policy S11 - Existing Employment Provision.
- 5.2.6 Having considered the ELNA and the planning history of Kingsnorth and the Isle of Grain, Table 9 shows the economic land supply.

Table 9: Economic Land Supply

LAA Site ID	Name	Land uses and floorspace within plan period	Plan period (Years)
CHR16	Cuxton Pit 1	EG(iii) / B2 / B8 / Sui generis (of an employment nature) - 25,300 sqm	6-10
CHR17	Cuxton Pit 2	EG(iii) / B2 / B8 / Sui generis (of an employment nature) - 14,600 sqm	6-10
CHR18	3 Acre Field	EG(iii) / B2 / B8 / Sui generis (of an employment nature) - 3,500 sqm	6-10
FH1	Innovation Park Medway	B2 - 11,248 sqm EG(iii) - 21,000 sqm	1-5, 6-10
HHH19	Deangate Retail Park (Flanders Farm)	B2 - 14,400 sqm	1-5
HHH35	Kingsnorth Expansion Area	EG(iii) / B2 / B8 / Sui generis (of an employment nature) - 157,000 sqm	11+
HHH36	MedwayOne (Former Kingsnorth Power Station)	EG(iii) / B2 / B8 / Sui generis (of an employment nature) - 324,450 sqm, allowing flexibility in the permitted development parameters (MC/21/0979)	1-5, 6-10
RWB5	Land adjacent to Royal Mail Depot, Maidstone Road, Rochester	EG(iii) / B2 / B8 / Sui generis (of an employment nature) - 3,693 sqm	6-10
SMI6	Basin3 Campus, Chatham Waters	EG(iii) / B2 / B8 / Sui generis (of an employment nature) as per the approved development parameters - 31,000 sqm	1-5

5.3 Conclusion

- 5.3.1 Following the Regulation 18 (2024) consultation, the LAA has identified a sufficient supply of sites that are suitable, available and achievable for housing and economic land up to 2041.
- 5.3.2 The reasons for site selection/rejection for allocation will be set out in the Sustainability Appraisal.
- 5.3.3 The Pre-submission Draft Local Plan will allocate sites for development.

Appendix B

Call for Sites Submissions

All valid submissions received through the call for sites (November 2022 to February 2023) are presented at Appendix B, which includes bookmarks by LAA Site ID.

Site ID: AS1

Form submission ID: 181

Respondent ID: 19

Supplementary information submitted: Yes

Existing site

Site name: *me38qs*

Site address: *Dormar Lodge, Fenn Street, St. Mary Hoo, Rochester, ME3 8QS*

Type of site: *Mixed*

What is the current land use of the site?

General industry (Class B2): *Not selected*

Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*

Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*

Please describe the current use: *n/a*

Residential institution (Class C2): **Selected**

Please describe the current use: *home*

Secure residential institution (Class C2a): *Not selected*

Please describe the current use: *n/a*

Dwellings (Class C3): **Selected**

Number of dwellings: *1*

Gypsy, Traveller and travelling showpeople pitches/plots: *Not selected*

Number of pitches/plots: *n/a*

House in multiple occupation (Class C4): *Not selected*

How many tenants occupy the dwelling? *n/a*

Commercial, business and service (Class E): *Not selected*

Please describe the current use: *n/a*

Learning and non-residential institution (Class F1): *Not selected*

Please describe the current use: *n/a*

Local community use (Class F2): *Not selected*

Please describe the current use: *n/a*

Minerals supply: *Not selected*

Please describe the current use: *n/a*

Waste management: *Not selected*

Other / Sui generis: *Not selected*

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

No answer given

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

No

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

1 year

What would the anticipated lead-in time be to starting construction?

1 year to 3 years

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

1 - 2 years

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
Fenn Farm (former farm house) is adjacent to the site and is grade II listed but does not form part of the site.
The site is outside the curtlage of the house.

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No answer given
No answer given

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

No

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

No

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Not known

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

1 year

What would the anticipated lead-in time be to starting construction?

1 year to 3 years

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

1 year

Please indicate the approximate timescale for delivery:

Within 5 years

Site ID: AS5

Form submission ID: 168

Respondent ID: 272

Supplementary information submitted: No

Existing site

Site name: *Location: Land South Of Fenn Corner Industrial Estate, Ratcliffe Highway, St Mary Hoo, Rochester, Medway*

Site address: *F B C UK Project Fenn Bell Inn, Fenn Corner, St. Mary Hoo, Rochester, ME3 8RF*

Type of site: *Mixed*

What is the current land use of the site?

General industry (Class B2): *Not selected*

Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*

Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*

Please describe the current use: *n/a*

Residential institution (Class C2): *Not selected*

Please describe the current use: *n/a*

Secure residential institution (Class C2a): *Not selected*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
Please see supporting Statement

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

Yes, there are constraints
There is a gas line accross the site - however it is not considered a constraint as a working strip can be provided to provide a buffer zone as agreed with the utility provider. In past experince this is usally only a 9m exclusion zone

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Enquiries received

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

After an allocation unless the Local Plan is not forthcoming in the next 2 years

What would the anticipated lead-in time be to starting construction?

Immediate after permission

What would be the anticipated annual build-out rate?

6 months

How many years would construction take to complete the development?

6 months

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No answer given
No answer given

Is the landscape character a development constraint?

No answer given
No answer given

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No answer given
No answer given

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
There are listed buildings nearby that would need to be considered as part of any future future development proposals, including Court Lodge Farm House (Grade II listed) and The Granary (Grade II listed) opposite the site.

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The site is presently in agricultural use; however, this use could wholly cease if development occurs.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

No answer given

Is mains sewerage supply available to the site?

No answer given

Is an electrical supply available to the site?

No answer given

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

No answer given

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

A planning application could be submitted at a suitable point in time alongside the progression of the Local Plan. The site would likely come forward after 2030

What would the anticipated lead-in time be to starting construction?

c 1 year following approval of a planning application.

What would be the anticipated annual build-out rate?

Not known.

How many years would construction take to complete the development?

Approximately 5 years.

Please indicate the approximate timescale for delivery:

Within 11 to 15 years

Site ID: AS13

Minerals supply: *Not selected*
Please describe the proposed use: *n/a*

Waste management: *Not selected*
Please describe the proposed use: *n/a*

Other / Sui generis: ***Selected***
Please describe the proposed use: *The site presents an opportunity for a sustainable residential extension to the west of the existing settlement, either side of Cuckolds Green Road, to support local shops and services. Depending on the scale of development, social infrastructure could be provided, but this would be dependent on the wider strategy for the surrounding Hoo Peninsula area. As the site is sustainable and accessible with no overriding constraints, there is scope for residential-led mixed-use development and open space.*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No answer given
No answer given

Is the landscape character a development constraint?

No answer given
No answer given

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
A small part of the site and Cuckolds Green Road are located in an area at medium risk of flooding (Flood Zone 2). This would be considered as part of the proposed access to the site, and residential development would not be located in this area, which would instead form an area of open space / SuDs fronting Cuckolds Green Road. It is also noted that there is a minor watercourse identified running north to south on land north of Cuckold Green Road with no floodplain associated with it, that would be incorporated within the masterplan as part of the proposed open space/SuDS design.

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

No, there are not constraints
n/a

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

Yes, there are constraints
A PRow Footpath (RS35) runs through the southern corner of the land south of Cuckolds Green Road. However, this could be retained and enhanced as part of the development proposals.

Is land contamination a development constraint?

No answer given
No answer given

Is a pipeline a development constraint?

Yes, there are constraints
There is a gas main easement which runs into the very north-east corner of the parcel south of Cuckolds Green Road. This affects a small part of the site and is located in an area bounded by a watercourse, which would be proposed as an area of open space as part of any development.

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
South View and Mackay?s Court (both Grade II) are in proximity to the site, however there are limited views, and this would be considered as part of any future planning application.

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The site is presently in agricultural use; however this use could wholly cease if development occurs.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

No answer given

Is mains sewerage supply available to the site?

No answer given

Is an electrical supply available to the site?

No answer given

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

No answer given

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

An outline planning application could be submitted at a suitable point in time but not within the next 10 years. The site would likely come forward after 2030.

What would the anticipated lead-in time be to starting construction?

Following approval of an outline application, we expect there would be a 1-year lead-in time for the submission of Reserved Matters and for site mobilisation.

What would be the anticipated annual build-out rate?

c.40 dwellings per annum

How many years would construction take to complete the development?

About 10 -15 years.

Please indicate the approximate timescale for delivery:

Within 11 to 15 years

Site ID: AS14

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No answer given
No answer given

Is the landscape character a development constraint?

No answer given
No answer given

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No answer given
No answer given

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
Mackay?s Court building (within the site) is Grade II listed, this would need to be considered as part of future development proposals.

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The site is presently in agricultural use; however, this use could wholly cease if development occurs.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

No answer given

Is mains sewerage supply available to the site?

No answer given

Is an electrical supply available to the site?

No answer given

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

No answer given

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

A planning application could be submitted at a suitable point in time alongside the progression of the Local Plan. The site would likely come forward after 2030.

What would the anticipated lead-in time be to starting construction?

c 1 year following approval of a planning application.

What would be the anticipated annual build-out rate?

Not known.

How many years would construction take to complete the development?

Approximately 5 years.

Please indicate the approximate timescale for delivery:

Within 11 to 15 years

Site ID: AS17

Form submission ID: 250

Respondent ID: 267

Supplementary information submitted: Yes

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
The site covers a small area in terms of agricultural production, with the funnelled shape of the parcel difficult to manoeuvre farm machinery into. It therefore has limited impact upon farming production.

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

Other / Sui generis: **Selected**

Please describe the proposed use: *Dwellings - Number TBC at this stage. The site presents an opportunity for a sustainable extension to the existing Allhallows settlement. As the site is sustainable and accessible with no overriding constraints, we consider that there is scope for mixed use development including residential, tourism and leisure uses, open space and associated infrastructure*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

Yes, there are constraints
Woodland TPO R5/1970 adjacent to the site, between the site boundary and Avery Way. This is not considered to present a constraint to development and would be considered as part of any future planning application.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
There are views to Slough Fort (Grade II*) and All Saints Church (Grade I) from within the site; however, the buildings are some distance from the site itself, separated by existing built development, and any impact on these assets would be considered as part of any development proposals.

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: ***Selected***

Please describe the proposed use: *The site presents an opportunity for a sustainable extension to the existing Allhallows settlement. As the site is sustainable and accessible with no overriding constraints, we consider that there is scope for mixed use development including residential, tourism and leisure uses, open space and associated infrastructure.*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

Yes, there are constraints
Woodland TPO R5/1970 adjacent to the site, between the site boundary and Avery Way. This is not considered to present a constraint to development and would be considered as part of any future planning application.

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No answer given
No answer given

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

Yes, there are constraints
A power line runs diagonally through the centre of the site, however it is considered that this could be suitably diverted or placed underground to enable development.

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
There are views to Slough Fort (Grade II*) and All Saints Church (Grade I) from within the site; however, the buildings are some distance from the site itself, separated by existing built development, and any impact on these assets would be considered as part of any future planning application.

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The site is presently in agricultural use; however this use could wholly cease if development occurs.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

No answer given

Is mains sewerage supply available to the site?

No answer given

Is an electrical supply available to the site?

No answer given

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

No answer given

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

An outline planning application could be submitted at a suitable point in time alongside the progression of the Local Plan; but this is unlikely to be in the next 10 years. The site would likely come forward after 2030.

What would the anticipated lead-in time be to starting construction?

Following approval of an outline application, we expect there would be a 1-year lead-in time for the submission of Reserved Matters and for site mobilisation.

What would be the anticipated annual build-out rate?

We would expect delivery of 40 dwellings per annum.

How many years would construction take to complete the development?

Approximately 10 years based on 40 dwellings per annum.

Please indicate the approximate timescale for delivery:

Within 11 to 15 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
The site is currently in agricultural use and therefore it is anticipated that any key habitats will be located within the hedgerows which bound the site. Any future planning application will be supported by an Ecological Assessment which will include all required phase 2 surveys. The assessment will provide appropriate mitigation where necessary and set out measures where new habitats can be created to achieve a minimum 10% Biodiversity Net Gain.

Is a tree or hedgerow a development constraint?

Yes, there are constraints
Hedgerows bound the site. Whilst some limited loss will be required to deliver an appropriate access into the site, any proposals will seek to limit any loss and compensate with new planting as part of a landscape strategy.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
A small part of the site is within Flood Zones 2 and 3, however it is noted that flood defenses are present. The proposals take this constraint into account and no development is proposed in areas liable to flooding.

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Within 6 months of achieving an allocation in an adopted Local Plan

What would the anticipated lead-in time be to starting construction?

Construction will start within 1 month of achieving the necessary Reserved Matters consents and discharge of conditions

What would be the anticipated annual build-out rate?

60 dwellings per year

How many years would construction take to complete the development?

5 years

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
The site is within 100m of the Thames Estuary and Marshes SSSI, SPA and Ramsar site and 6km of the North Kent Marshes SPA/Ramsar Sites but the proposal is expected to be acceptable in terms of its impact on these with appropriate mitigation measures. A similar application (MC/18/0288) on the adjacent site was assessed acceptable in ecological terms and was approved in 2019.

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Other / Sui generis: **Selected**

Please describe the proposed use: *As discussed recently with officers, the Grain Business park permission remains extant (with outline permission for up to 464,685 sqm for B1(c), B2 and B8 uses). However, there is significant potential for a wide range of energy uses across the entire site also. The 2003 Medway Plan specifically identifies this site for a wide range of uses including B1(c), B2 and B8 uses, special industrial uses and industrial uses not in a use class. We believe that this broad range of uses should be retained in the new Local Plan, to maintain flexibility on this regionally and nationally significant site.*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
The site is an old oil refinery, so there will inevitably be areas of contamination, but this can be addressed through development and application of appropriate mitigation measures.

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
Yes there are constraints in terms of adjacent ecological designations and protected species on site, but these are well understood and documented through various planning applications. An environmental mitigation area linked to existing permissions has been shown on the plan submitted with these representations.

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
Large parts of the site are in FZ 3, but it is protected by flood defences.

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
The site is an old oil refinery, so there will inevitably be areas of contamination, but this can be addressed through development and application of appropriate mitigation measures.

Is a pipeline a development constraint?

Yes, there are constraints
As you would expect for a site with a multitude of energy based operations, there are various pipelines across this site, but they are well understood by Thamesport Interchange Ltd.

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

No

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

TBC

What would the anticipated lead-in time be to starting construction?

TBC

What would be the anticipated annual build-out rate?

TBC

How many years would construction take to complete the development?

TBC

Please indicate the approximate timescale for delivery:

Within 5 years, Within 6 to 10 years, Within 11 to 15 years, 15 years +

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Once site is allocated in Local Plan

What would the anticipated lead-in time be to starting construction?

12 months from receipt of planning permission

What would be the anticipated annual build-out rate?

15-25 per annum

How many years would construction take to complete the development?

2 Years

Please indicate the approximate timescale for delivery:

Within 5 years

Please describe the proposed use: *The existing CCGT and power generation uses would remain (Grain B site ~ 10.52ha, National Grid ~8.62ha) and do not form part of any of the GIA floor area at the Site. The whole Site is being put forward with circa 170,000 sqm of floorspace immediately available. In addition to B2/B8 uses, the Site is also considered suitable for energy generating uses.*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
Brownfield site. The need for remediation is likely but this is not a constraint to development.

Is the landscape character a development constraint?

Yes, there are constraints
Site adjoins the River Medway

There is no specific landscape designation but any future application will be informed by an extensive LIVA and Landscape Strategy.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
The Site adjacent to the River Medway which is designated as an SSSI, SPA and Ramsar Site.

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
The Site is located within an area of flood risk but is defended. Given the nature of the development proposed, this is not considered to be a constraint.

Are there any other development constraints relating to the natural environment?

Yes, there are constraints
Proximity to the River Medway SSSI SPA and Ramsar

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
The need for remediation is likely but this is not a constraint to development.

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No answer given
No answer given

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

Yes, there are constraints
Existing power station Grain B and National Grid infrastructure

Proximity to the River Medway SSSI SPA and Ramsar

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Proposed development

What is the proposed land use?

General industry (Class B2): *Not selected*
Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*
Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*
Please describe the proposed use: *n/a*

Residential institution (Class C2): *Not selected*
Please describe the proposed use: *n/a*

Secure residential institution (Class C2a): *Not selected*
Please describe the proposed use: *n/a*

Dwellings (Class C3): **Selected**
Minimum number of dwellings: *60*
Maximum number of dwellings: *90*

Self build and custom build: *Not selected*
Minimum number of dwellings: *n/a*
Maximum number of dwellings: *n/a*

Gypsy, Traveller and travelling showpeople pitches/plots: *Not selected*
Number of pitches/plots: *n/a*

House in multiple occupation (Class C4): *Not selected*
How many tenants would occupy the dwelling? *n/a*

Commercial, business and service (Class E): **Selected**
Please describe the proposed use: *The council has secured Future High Street funds - the outputs of this are to support an active use on the ground floor to support sustainable live-work opportunities in the High Street and strengthen the cultural experience offered to visitors and residents. The ground floor is 24,237 sqft and should not impair the potential redevelopment of the first to fourth floor storeys for residential occupation.*

Learning and non-residential institution (Class F1): **Selected**
Please describe the proposed use: *Subject to marketing, this is an option that may be delivered. Cultural experience is an output of the Future High Streets fund.*

Local community use (Class F2): *Not selected*
Please describe the proposed use: *n/a*

Minerals supply: *Not selected*
Please describe the proposed use: *n/a*

Waste management: *Not selected*
Please describe the proposed use: *n/a*

Other / Sui generis: **Selected**
Please describe the proposed use: *Subject to interest and bid following the current marketing exercise.*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
The site may be included within a trial for a Design Code to be delivered. Currently, the building is identified as a landmark in the Chatham Masterplan and it may be accepted to consider roof top development, subject to interest and should this be a viable option to deliver.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
The building front Chatham High Street, flood zone 2. There is no residential proposed for the ground floor.

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

No answer given
No answer given

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

Yes, there are constraints
Should the site be delivered for residential then the required proportion of parking will need to be provided and options in the proximity considered.

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
248 High St, Chatham ME4 4AN is a listed building. Subject to viability and interest, the height of the building could be extended - building upon the 'primary landmark anchor' that the building already provides for the High Street, as set out in the Chatham Masterplan.

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

Yes, there are constraints
Should the building be used for residential occupation, works may be required to enable compliance with building regulations in relation to noise and pollution.

Are there any other development constraints relating to the built environment?

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No answer given
No answer given

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is being marketed

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

Planning application for the ground floor frontage and change of use (subject to marketing) will be submitted in 2023. A planning application for the first to fourth floor will be submitted subject to marketing and viability and would be unlikely to be submitted in 2023.

What would the anticipated lead-in time be to starting construction?

3 months for the ground floor. 6 months for first to fourth floor.

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

6 months for ground floor. 2-3 years for first to fourth floor.

Please indicate the approximate timescale for delivery:

Within 5 years

Minerals supply: *Not selected*

Please describe the current use: *n/a*

Waste management: *Not selected*

Please describe the current use: *n/a*

Other / Sui generis: ***Selected***

Please describe the current use: *Agricultural land, quarried areas and small business use at Whittings Farm*

Vacant / Cleared of structures / Inactive: *Not selected*

Please provide further information: *n/a*

Current planning permission(s), including reference numbers:

Par tof site falls wihtin extent of planning permission MC/02/2495 related to Holborough Cement Works

Other relevant planning history:

Site forms part of the wider estate asociated wiht the Medway Cement Works which is subject to an implemented planning permission

Proposed development

What is the proposed land use?

General industry (Class B2): *Not selected*

Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*

Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*

Please describe the proposed use: *n/a*

Residential institution (Class C2): ***Selected***

Please describe the proposed use: *Opportunities as part of a mixed use development*

Secure residential institution (Class C2a): *Not selected*

Please describe the proposed use: *n/a*

Dwellings (Class C3): ***Selected***

Minimum number of dwellings: *1000*

Maximum number of dwellings: *1100*

Self build and custom build: *Not selected*

Minimum number of dwellings: *n/a*

Maximum number of dwellings: *n/a*

Gypsy, Traveller and travelling showpeople pitches/plots: *Not selected*

Number of pitches/plots: *n/a*

House in multiple occupation (Class C4): *Not selected*

How many tenants would occupy the dwelling? *n/a*

Commercial, business and service (Class E): ***Selected***

Please describe the proposed use: *Opportunities as part of a mixed use development*

Learning and non-residential institution (Class F1): ***Selected***

Please describe the proposed use: *Opportunities as part of a mixed use development*

Local community use (Class F2): ***Selected***

Please describe the proposed use: *Opportunities as part of a mixed use development*

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: ***Selected***

Please describe the proposed use: *The site can be delivered as a stand alone opportunity entirely within the Medway Council administrative area but also forms part of a larger opportunity which includes land to the south within the Tonbridge and Malling administrative area. The larger opportunity could deliver an urban extension to Snodland providing up to around 5,000 homes, new schools, community and commercial facilities as well as extensive green infrastructure. The uploaded Propsectus describes both possibilities.*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
Site is close to AONB with any development proposal subject to full landscape and visual impact appraisal with any necessary mitigation addressed by planning conditions and/or planning obligations.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
Site includes Grade 2 and 3 agricultural land

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Other

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

A planning applicaiton could be submitted in 2024

What would the anticipated lead-in time be to starting construction?

Lead-in likely to be in the region of 24 months subject to timescales for reserved matters approval.

What would be the anticipated annual build-out rate?

Build out rate of at least 70 units per year could be achieved

How many years would construction take to complete the development?

Estimated 10 year build out

Please indicate the approximate timescale for delivery:

Within 5 years

Waste management: **Selected**

Please describe the proposed use: *Extension to the existing household waste and recycling centre site.*

Two potential options have been drawn up to show how the existing household waste and recycling centre site could be extended with an additional level platform of 6,000 sq m. Option 1 shows the existing access road to the caravan site and treatment works would be retained and widened and would be supplemented with a passing bay to provide access to the commercial area. Option 2 shows the existing access road to the caravan site and treatment works would be retained with a new access route proposed around the existing level platform to the new commercial area. The existing access road to the caravan site and treatment works would be retained.

Other / Sui generis: *Not selected*

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
The topography of the site is a challenge. There is a significant gradient north to south from Sundridge Hill. Level differences within the site range from 35m AOD close to Sunridge Hill to 7m AOD in the southern part of the site. The existing access road serving the caravan site and the treatment works is steep. However, as demonstrated in the attached option plans, there is potential to create a proposed level platform within the site to enable commercial development to take place. A Site Investigation Report has been carried out for the battery storage site which is to the south of the site and which has been submitted and approved as part of Planning Application MC/20/2741. From the historic maps there is evidence of a brick pit on the site. However, on the basis of the geology of the area, and the historic maps, it is considered that the site is not likely to be at risk from ground movements due to previous mines and quarrying.

Is the landscape character a development constraint?

Yes, there are constraints
The site is located in the countryside, an Area of Local Landscape Importance and within a Strategic Gap as defined by the local plan policies BNE25, BNE34 and BNE31.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
There are no sites of Special Scientific Interest (SSSI), Special Protection Areas, Conservation Areas, National Nature Reserves, Local Nature Reserves, National Parks, World Heritage Sites, Environmentally Sensitive Areas, Nitrate Sensitive Areas or RAMSAR (wetlands) within 1km of the site. The site is located within a Nitrate Vulnerable Zone. Baty's Marsh Local Nature Reserve is located approximately 1056m from the site. There are five records of Designated Ancient Woodland within 1km of the site Kent Downs Area of Outstanding Natural Beauty is recorded at 179m north of the site, 365m southeast and 1590m west of the site. A Phase I Extended Habitat Survey was completed and submitted for the battery storage site (Planning Application MC/20/1910) to the south of the site.

Is a tree or hedgerow a development constraint?

Yes, there are constraints
There are woodland areas, hedgerow and scrub areas within the site.

Trees and hedgerows on the site will be protected and retained where possible.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Is access to the site a development constraint?

Yes, there are constraints
The access road to the site is steep due to the topography of the area. However, as demonstrated by the attached option plans, there are options for either retaining and widening the existing access road to improve access to the wider site, or to create a separate access road into the newly created commercial area to the south of the existing household waste and recycling centre site.

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
Previous use of the site to the south as a sewage treatment works. Battery storage facility adjacent to the site. A Site Investigation Report for the battery storage facility on the adjacent site to the south has been submitted and approved by the Local Planning Authority as part of the discharge of conditions for the planning consent for the storage facility.

Is a pipeline a development constraint?

Yes, there are constraints
Please refer to accompanying Utilities Plan.

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

Yes, there are constraints
Household waste and recycling centre to the north of the site.

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The Battery Pack Operator on the site to the south has access via the track.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

Yes
Southern Water still has a right to access their wells.

Are there any other legal constraints?

Yes
An overage clause applies to the land parcels relating to C3 residential use on the site.

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No

Is a public highway connection available to the site?

No

Is a landline telephone / broadband internet connection available to the site?

No

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

2023

What would the anticipated lead-in time be to starting construction?

12 months

What would be the anticipated annual build-out rate?

n/a

How many years would construction take to complete the development?

6 months

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No answer given
No answer given

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No answer given

Current planning permission(s), including reference numbers:

No answer given

Other relevant planning history:

The site formed part of a wider 27ha site subject to an outline planning permission (for a residential-led mixed use scheme, most of which has since been either constructed and/or reserved matters have been approved. This part of the site was shown to be proposed as a mix of employment and residential uses. This is discussed further in the accompanying covering letter.

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
See covering letter

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
As an industrial site there is the potential for contaminated land. An appropriate assessment can be provided to accompany any future planning application.

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Site is being marketed

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

2023

What would the anticipated lead-in time be to starting construction?

1 year from grant of planning permission

What would be the anticipated annual build-out rate?

50 units per annum

How many years would construction take to complete the development?

3

Please indicate the approximate timescale for delivery:

Within 5 years

Site ID: FP10

Natural constraints

No, there are not constraints
n/a

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
An Ecological Appraisal has been undertaken. This found that the habitats present on site are of low ecological value and do not form a constraint to the proposals. The only exception is the mudflats, which form a priority habitat type, but which are proposed to be retained in any event. There are few opportunities for protected species on site and no evidence of protected species was recorded during the survey work. Appropriate mitigation measures are proposed to safeguard nesting birds and foraging and commuting bats, which may be present in the wider area. Part of the site overlaps with the statutory designated Medway Estuary Marine Conservation Zone (MCZ). In order to safeguard Medway Estuary MCZ, it is proposed that any works affecting this habitat (such as piling or reinforcement of the river wall) are subject to a specific method statement detailing measures to ensure the habitat is safeguarded. KCC Ecology have confirmed that the development of the site would be acceptable subject to appropriate conditions.

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
Part of the site falls within a flood zone, being adjacent to the River Medway although the Environment Agency has confirmed that it has no objections to the proposed use and layout of the development as proposed in the current application, which it agrees includes sufficient flood mitigation measures. The EA has however requested further detail on the existing and proposed flood defences within the site, which is being provided.

Are there any other development constraints relating to the natural environment?

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
The site has historically been used for car-related uses. A detailed contamination assessment has been undertaken which was submitted with the current planning application. The submitted report notes that the site has previously been developed as a dockland within its northern end. Historical and contemporary industrial and commercial uses have included a wharf with warehouses, the use of cranes, weighbridge, and the use of the site as a car dealer/service centre. There is also a potential for underground fuel storage tanks to be present on site however this has not been confirmed during the investigations undertaken to date. No significant sources of on-going contamination were noted during the site walkover. It was considered that the primary source of contamination was the site's historical industrial/commercial use. The site is not located within an Environment Agency defined groundwater source protection zone. Concentrations of toxic metals were generally below their respective soil guideline values. However elevated lead concentrations were encountered across the site. Whilst, in general, organic hydrocarbon concentrations were not significantly elevated, certain slightly elevated PAH and BTEX compounds were encountered within localised areas. Elevated levels of contaminants have been found at the site which could pose a risk to future occupants if exposed to the material for instance in a garden or area of soft landscaping. In areas which are to be covered by either buildings or hard standing, no clean cover layer is required to sever the contain source to receptor pathway. However, during the enabling works the surface layer will be removed pending either off-site disposal or for reuse below buildings and hardstanding across other areas of the site. Site profiling works are likely be necessary as part of the development. It is anticipated that the site will be plateaued to suit the various floor/pavement levels ready to receive the pile mat/pavement base with all soils removed from site down to these levels thereby removing a proportion of the near surface contaminated soils from site. This will remove the potential risk to human health from the lead and organic contamination encountered, by capping the site. Following the successful completion of these remedial works, the risks to the underlying aquifer would be considered to be low. There is a possibility of the presence of Asbestos Containing Material (ACM) within the fabric of the existing site buildings. Prior to demolition, a formal asbestos survey of existing buildings on site would need to be undertaken by a competent contractor. The report recommends that a watching brief be implemented on this site during enabling works and should any further contamination or potentially contaminative sources be discovered during the proposed enabling works all site works would cease and suitably competent consultants/engineers will attend site to agree a formal remediation strategy. The report concludes that based on the principles and definitions outlined under section 57 of the Environment Act 1995, the site would not be considered to be "Contaminated Land" based on its proposed redevelopment with a change of end use to residential without plant uptake, provided that the recommended remedial works are implemented.

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
The site is located within the Star Hill to Sun Pier Conservation Area. With the exception of a small 19th or early 20th century industrial warehouse within the site, which possesses limited historic interest, the existing buildings on the site detract from the appearance of the conservation area, at odds with the traditional fine grain townscape and incongruous with the historic enclosure which characterises the High Street. The current buildings and uses do not contribute to the character and appearance of the conservation area. The Heritage Assessment submitted with the current application demonstrates only a limited degree of harm (at the lower end of the less than substantial scale) arising from this element of the proposals, which is outweighed by urban design benefits, resulting in an overall enhancement to the character and appearance of the Conservation Area.

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
The site does not affect or impact on any World Heritage Sites, Scheduled Ancient Monuments, Registered Battlefields, or Registered Parks and Gardens. There are three listed buildings in the vicinity of the site. These are: (1) The Hospital of Sir John Hawkins and Attached Front Railings which is Grade II listed and situated immediately adjacent to the west of the site; (2) 35 High street, a Grade II listed building, immediately adjacent to the east of the site; (3) St Bartholomew's Chapel, a Grade II listed building, which occupies a corner plot on the opposite site of High Street, slightly to the west of the site The Heritage Assessment submitted with the current application has extensively tested the potential impacts of the development on nearby listed buildings, finding in each case that there is either a net enhancement to the setting of listed buildings or no material effect. In particular, there will be a net enhancement to the setting of two listed building adjacent to the site, the Grade II Hospital of Sir John Hawkins and 35 High Street. There will also be an enhancement to the setting of nearby Grade II* listed St Bartholomew's Chapel. In wider views, the assessment concludes that the proposals will have a de minimis effect on views towards Rochester Castle and the Cathedral, and in views including Chatham Dockyard, and the collections of listed buildings in both locations.*

Is archaeological interest a development constraint?

Yes, there are constraints
No prehistoric, Romano-British, Anglo-Saxon or medieval archaeological remains have been reported within the site or within 150m of its boundaries. However, the site's location means there is some potential for archaeological finds and an appropriate condition requiring an archaeological mitigation scheme would be appropriate. This should not prevent allocation of the site for development.

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

Submitted in 2021 - not yet determined

What would the anticipated lead-in time be to starting construction?

6 months from issue of planning permission

What would be the anticipated annual build-out rate?

50-75 units per annum

How many years would construction take to complete the development?

2-3 years

Please indicate the approximate timescale for delivery:

Within 5 years

How many tenants would occupy the dwelling? *n/a*

Commercial, business and service (Class E): ***Selected***

Please describe the proposed use: *Residential led mixed use with flexible non resi uses*

Learning and non-residential institution (Class F1): *Not selected*

Please describe the proposed use: *n/a*

Local community use (Class F2): *Not selected*

Please describe the proposed use: *n/a*

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: *Not selected*

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
Possible ground contamination

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
To the north of the site lies the Medway Estuary which is a designated site (Ramsar, North Kent Marshes SPA and SSSI.

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
The site is partially located within Flood zone 1,2, and 3. The majority of the site is located within flood zone 3b.

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
The majority of the site is in use as a gasworks therefore it is likely to be contamination constraints.

Is a pipeline a development constraint?

Yes, there are constraints
There will be some remaining and residual gas infrastructure but not a barrier to development

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Leasee

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is owned by a developer

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

No answer given

What would the anticipated lead-in time be to starting construction?

No answer given

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

No answer given

Please indicate the approximate timescale for delivery:

Within 5 years

N/A

Other relevant planning history:

An outline planning application was prepared (ref: MC/11/2516) and submitted in 2011 for a mixture of up to 5,000 residential units, commercial and ancillary uses which included proposed residential and assisted living development on Lodge Hill Camp. The application had a resolution to grant at Committee on 4 September 2014, however the application has since been withdrawn and revised proposals for a smaller proportion of the site are being prepared by Homes England.

Proposed development

What is the proposed land use?

General industry (Class B2): **Selected**
Gross internal area (sqm): 1

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
Lodge Hill Camp is situated adjacent to Chattenden Woods and Lodge Hill SSSI. Redevelopment proposals would not be located on these features. Protected species utilise the Site and immediate vicinity including reptiles and bats and appropriate consideration would need to be given to avoid contravention of nature conservation legislation. Any future outline planning application for this parcel and any works required to minimise the impact on these important ecological features would need to be considered as part of any future masterplanning.

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
Yes, there are constraints *Chattenden Barracks is situated adjacent to Chattenden Woods and Lodge Hill SSSI and in close proximity to Ancient Woodland. Proposed residential development would not be located on these features. The SSSI is notified as such in view of known presence of Common Nightingale. Protected species, including reptiles and bats utilise the parcel of land and immediate vicinity. Appropriate consideration is being given to this as proposals are progressed for the site. Homes England, as landowner, are continuing to collate a robust suite of evidence. This will support a future outline planning application for this parcel and any works required to minimise the impact on these important ecological features will be considered as part of the future masterplanning.*

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No answer given
No answer given

Are there any other legal constraints?

No answer given
No answer given

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Winter 2023

What would the anticipated lead-in time be to starting construction?

2-3 years post OPA determination.

What would be the anticipated annual build-out rate?

TBC

How many years would construction take to complete the development?

c.6 years

Please indicate the approximate timescale for delivery:

Within 6 to 10 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
topography is very undulating

Is the landscape character a development constraint?

Yes, there are constraints
Yes a significant number of trees, which we are keen to retain if possible

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
There are several listed Wildlife and Countryside Act protected species on the Deangate site that, if negatively impacted by future development, will require either mitigation plans, translocation or compensation of habitat in accordance with the mitigation hierarchy

Is a tree or hedgerow a development constraint?

Yes, there are constraints
Multiple trees and landscape features to consider

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

Yes, there are constraints
water courses and streams and adjacent SSSI

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No answer given
No answer given

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No answer given
No answer given

Is a conservation area designation a development constraint?

Yes, there are constraints
adjacent SSSI and mitigation must be considered

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No answer given
No answer given

Are there covenant constraints?

No answer given
No answer given

Are there any other legal constraints?

No answer given

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

No answer given

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

Jan-25

What would the anticipated lead-in time be to starting construction?

6 months

What would be the anticipated annual build-out rate?

estimated at; 2026/7 - 40, 27/28 - 60, 28/29 80 29/30 - 120, 30/31 - 138, 31/32 - 80. 32/33 - 72, 33/34 - 60.

How many years would construction take to complete the development?

10

Please indicate the approximate timescale for delivery:

Within 6 to 10 years

Site ID: HHH8

Form submission ID: 184

Respondent ID: 333

Supplementary information submitted: No

Existing site

Site name: *Land west of Hoo St Werburgh*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints

The ground itself is not a constraint although some parts of the site are challenging in terms of gradient. There are various underground utilities crossing the site, which will kept in situ with appropriate buffers provided.

Is the landscape character a development constraint?

Yes, there are constraints

The upper slopes of the site are visible in the wider landscape and so will remain open.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints

The site varies between 3a and 3b. The pre-dominant ALC is 3b (moderate quality).

Are ecological designations a development constraint?

Yes, there are constraints

The site itself is not subject to ecological designations but there are designations in the wider area (SSSI, SPA, Ramsar) that are relevant.

Is a tree or hedgerow a development constraint?

Yes, there are constraints

There is existing hedgerow and limited tree cover, which will be retained save for where requires for access. Replacement planting will be provided.

Is a tree preservation order a development constraint?

Yes, there are constraints

A TPO applies to a tree line on the eastern boundary where the site adjoins the rear gardens of properties on Knights Road. These trees have been surveyed and will be avoided by any new development.

Is flooding a development constraint?

Yes, there are constraints

There are limited flood extents associated with the Hoo Stream. This will be avoided in terms of any new development.

Are there any other development constraints relating to the natural environment?

Yes, there are constraints

No

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

Yes, there are constraints
There are gas mains that cross the site, which will be avoided and remain in situ.

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
The Grade II Listed Mill House adjoins the land to the northern boundary with Ratcliffe Highway. A suitable stand off from this property will be provided to respect its setting.

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

Yes, there are constraints
There is ambient noise associated with adjoining highway, particularly Peninsula Way. An appropriate stand off and other mitigation will be provided.

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is owned by a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

2023

What would the anticipated lead-in time be to starting construction?

9 months from planning permission

What would be the anticipated annual build-out rate?

Approximately 75 properties p.a.

How many years would construction take to complete the development?

Approximately 7 years

Please indicate the approximate timescale for delivery:

Within 5 years

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

Yes, there are constraints
Public Right of Way RS102 runs through the north eastern corner of the site connecting Ratcliffe Highway to Vidgeon Avenue.

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Q4 2024 / Q1 2025

What would the anticipated lead-in time be to starting construction?

24 months

What would be the anticipated annual build-out rate?

30 dwellings per annum

How many years would construction take to complete the development?

6 years

Please indicate the approximate timescale for delivery:

Within 6 to 10 years

Site ID: HHH16

Form submission ID: 183

Respondent ID: 330

Supplementary information submitted: Yes

Existing site

Site name: *Deangate Cottage and Land*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

Yes
Covenant exists with Ossenton Local farmer, he gets a percentage of the sale price if land is uplifted in value. But has no say on land itself.

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

No

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

No answer given

What would the anticipated lead-in time be to starting construction?

No answer given

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

No answer given

Please indicate the approximate timescale for delivery:

Within 6 to 10 years

Proposed development

What is the proposed land use?

General industry (Class B2): *Not selected*

Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*

Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*

Please describe the proposed use: *n/a*

Residential institution (Class C2): *Not selected*

Please describe the proposed use: *n/a*

Secure residential institution (Class C2a): *Not selected*

Please describe the proposed use: *n/a*

Dwellings (Class C3): ***Selected***

Minimum number of dwellings: *1500*

Maximum number of dwellings: *1500*

Self build and custom build: *Not selected*

Minimum number of dwellings: *n/a*

Maximum number of dwellings: *n/a*

Gypsy, Traveller and travelling showpeople pitches/plots: *Not selected*

Number of pitches/plots: *n/a*

House in multiple occupation (Class C4): *Not selected*

How many tenants would occupy the dwelling? *n/a*

Commercial, business and service (Class E): *Not selected*

Please describe the proposed use: *n/a*

Learning and non-residential institution (Class F1): *Not selected*

Please describe the proposed use: *n/a*

Local community use (Class F2): *Not selected*

Please describe the proposed use: *n/a*

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: ***Selected***

Please describe the proposed use: *As the site is sustainable and accessible with no overriding constraints, the site presents an opportunity for a sustainable extension to the east of the existing settlement of Hoo St Werburgh. The site should be considered as part of the wider Hoo St Werburgh Rural Town, which will deliver a highly sustainable community securing significant housing growth supported by infrastructure; employment opportunities; services and facilities as well as environmental enhancements (as set out in the draft Hoo Development Framework Masterplan, November 2022).*

Natural constraints

No, there are not constraints
n/a

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
The site comprises a mix of agricultural land, which has been assessed by a supporting Agricultural Land Classification Report (2015); this shows that the majority of the land is Grade 3a, with pockets of Grade 2 and 3b. The loss of such land should be considered in the wider context of the need for housing development and sustainable locations such as this.

Are ecological designations a development constraint?

Yes, there are constraints
The supporting Ecological Assessment (January 2023) sets out that there are several statutory designated sites in the vicinity of the site and that habitats within the site may be functionally-linked to the Medway Estuary and Marshes SPA and Ramsar site. Mitigation measures to avoid negative impacts upon the designating features of these sites would be considered as part of the strategic SEMS proposals and of any future planning application, with particular regard to any added recreational pressures brought about by new development.

Is a tree or hedgerow a development constraint?

Yes, there are constraints
There is a tree lined track running through the centre of the site (north to south), which would be retained as part of a green corridor/route and potential secondary vehicular access as part of the development. This considered within the latest Hoo Development Framework Plan.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
Yes, there are constraints (Please provide further details) X The site is in Flood Zone 1 and so considered at low risk of flooding from rivers and the sea. There is a potential area of overland surface water flood risk associated with a natural ground depression. This would be considered and retained within the development, forming a part of the drainage strategy.

Are there any other development constraints relating to the natural environment?

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

Yes, there are constraints
A number of footpaths run through the site, including Saxon Shore Way. These would however all be retained, incorporated and enhanced as part of any future planning application. This is reflected by the concept proposals undertaken to date and the draft Hoo Development Framework Plan (November 2022).

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

Yes, there are constraints
There are a number of existing pipelines, mostly in the northern section of the site, which require an easement as part of the development. This is fully assessed within the supporting Utilities Consultation Note (September 2020).

Are overhead cables a development constraint?

Yes, there are constraints
There are existing overhead 11kV cables on poles from the southern boundary to the existing farm premises in the centre of the site which require an easement as part of the development. This is fully assessed within the supporting Utilities Consultation Note (September 2020).

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
Four Pillboxes (both Grade II) are located along the western boundary of the site, as well as a cluster of listed buildings to the south of the site and a tank stop line. These would be considered as part of any planning application, and the accompanying Heritage Assessment (January 2023) fully assesses the potential impacts on these of future development.

Is archaeological interest a development constraint?

Yes, there are constraints
The supporting Heritage Assessment (January 2023) concludes that the site (including the wider Hoo site as a whole) has an overall low to moderate potential for significant archaeological remains to be present within the site, albeit further site investigation might be deemed necessary.

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The site is presently in agricultural use; however this use could wholly cease if development occurs.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

No

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

An outline planning application could be submitted at a suitable point in time alongside the progression of the Local Plan; this could be c.2030/31.

What would the anticipated lead-in time be to starting construction?

Following approval of an outline application, we expect there would be a 1-2 year lead-in time for the submission of Reserved Matters and for site mobilisation.

What would be the anticipated annual build-out rate?

An assumed consecutive delivery of c. 80 units per annum per each outlet.

How many years would construction take to complete the development?

c. 20 years

Please indicate the approximate timescale for delivery:

15 years +

Please provide further information: *n/a*

Current planning permission(s), including reference numbers:

The site has not been the subject of any major planning applications previously, whilst the vast majority of applications submitted in the immediate vicinity relate to minor residential works to existing dwellings.

Other relevant planning history:

In September 2018, Redrow obtained planning (Ref: MC/17/4408) for 66 dwellings and associated new access, car parking, landscaping and open space at Walnut Tree Farm in High Halstow. This development has been constructed and is located in close proximity to the site. Land Promotion The Site was allocated for residential development (including land reserved for a 2FE primary school and other commercial/communities uses) in both the Medway Local Plan Regulation 18 (June, 2020) and the Regulation 19 (October, 2021) consultations, as site 1113 'Land East of High Halstow' and F.4, respectively. It is noted that the Medway Local Plan Regulation 19 was published as part of the agenda pack for Full Council Meeting on 7th October 2021, however the meeting was postponed and following the postponement, Medway Council have withdrawn the Medway Local Plan Regulation 19. The Site however continues to be promoted for development in the emerging Hoo Development Framework ('HDF') document, which will set out a high-level masterplan and key development principles to guide future development on the Peninsula. This forms part of the £170million granted from the Housing Infrastructure Fund ('HIF') that received from Central Government in November 2019. Lastly, the Site is identified under Policy HH PQ4 'Land to the East of High Halstow' within the High Halstow Parish Council Regulation 14 Consultation of the Draft Neighbourhood Plan 2020 – 2037 ('draft NP').

Proposed development

What is the proposed land use?

General industry (Class B2): *Not selected*

Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*

Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*

Please describe the proposed use: *n/a*

Residential institution (Class C2): *Not selected*

Please describe the proposed use: *n/a*

Secure residential institution (Class C2a): *Not selected*

Please describe the proposed use: *n/a*

Dwellings (Class C3): ***Selected***

Minimum number of dwellings: *700*

Maximum number of dwellings: *760*

Self build and custom build: *Not selected*

Minimum number of dwellings: *n/a*

Maximum number of dwellings: *n/a*

Gypsy, Traveller and travelling showpeople pitches/plots: *Not selected*

Number of pitches/plots: *n/a*

House in multiple occupation (Class C4): *Not selected*

How many tenants would occupy the dwelling? *n/a*

Commercial, business and service (Class E): ***Selected***

Please describe the proposed use: *Local centre (up to 1,000 sqm Use Classes E and F)*

Learning and non-residential institution (Class F1): ***Selected***

Please describe the proposed use: *2FE Primary School*

Local community use (Class F2): ***Selected***

Please describe the proposed use: *Local centre (up to 1,000 sqm Use Classes E and F)*

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: ***Selected***

Please describe the proposed use: *Provision will be made for self build and custom build within the development.*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
The Site is covered by published landscape character assessments at a national, county and local level. The Site is located within the Hoo Peninsula Farmland Landscape Character Area in the Medway Landscape Character Assessment (2011), which is described as having: • Weak landscape structure, lack of distinctiveness and overall coherence; • Field boundaries – mixed fences and hedges – sparse and poorly managed hedgerows, isolated trees and blocks of woodland (often around farm buildings); and • Many detracting features – poor quality edges to farms and settlements with discordant conifers, roads (notably A228), railway, signs, telephone lines and pylons/ power lines.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
The Site comprises Grade 3 (Good to Moderate) quality agricultural land.

Are ecological designations a development constraint?

Yes, there are constraints
The site supports habitats of no more than low ecological value. The site comprises a large area of formerly arable land which has been left fallow and is recolonising with ruderal species. A network of ditches are present at the site, which were largely recorded to be dry and encroached with Bramble scrub, although the ditch at the northern boundary was recorded to hold a small amount of water. Surveys have been undertaken in relation to bats, Badger, Water Vole, breeding birds, reptiles and amphibians. These surveys have recorded low numbers of foraging and commuting bats, an outlier Badger sett, Water Vole at the northern boundary ditch (although the remaining ditches, being dry, are considered suboptimal for this species), small numbers of breeding birds including a number of Skylark territories, a population of Common Lizard, and a population of Great Crested Newt associated with off-site ponds to the north of the site. The ancient woodland will be safeguarded through the establishment of a minimum 15m buffer to development, along with a substantial area of new woodland proposed adjacent to the north. Protected species will be safeguarded through appropriate mitigation measures, whilst the new woodland, wetland and grassland habitats will be designed to provide new opportunities for these species.

Is a tree or hedgerow a development constraint?

Yes, there are constraints
Hedgerows at the site are present, albeit of a very gappy character with large sections of the boundary with no hedge present. An area of Ancient Woodland is present adjacent to the eastern boundary.

Is a tree preservation order a development constraint?

Yes, there are constraints
There are no trees on-site which are subject to a Tree Preservation Order (TPO). There is an area of Ancient Woodland, known as Fishers Wood, which lies adjacent to the Site boundary to the south-east.

Is flooding a development constraint?

Yes, there are constraints
The Site is located in Flood Zone 1 (low probability of flooding from fluvial sources) but is considered to be at medium risk of surface water flooding due to the presence of drains on-site.

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

Yes, there are constraints
Connecting to the existing community will mean improving the pedestrian routes into the village, along Christmas Lane, Britannia Road, and along the public right of way. On vehicle access, several smaller junctions both north and south will be more in keeping with the existing street network in the village than a single large access.

Is a public right of way a development constraint?

Yes, there are constraints
The Medway Peninsula RS44#1 Public Right of Way (PRoW) crosses the site to the east from High Halstow before turning southwards, linking Britannia Road and Christmas Land and subsequently extending to Sharnal Street to the south.

Is land contamination a development constraint?

Yes, there are constraints
The potential for significant contamination is very low. There are no registered current or historical landfills, or other licenced industrial land-uses present on or in proximity to the Site.

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

Yes, there are constraints
There is an existing overhead power line that will be diverted underground as part of the proposed development.

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
There are no listed buildings or registered parks and gardens within the vicinity of the Site, with the exception of the Grade II listed Fenn Street Farm House, located approximately 90m to the north-east.

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

A hybrid planning application will be submitted to Medway Council at the end of March 2023. The proposed description of development is: Hybrid planning application seeking outline permission (all matters reserved except for access) for the erection of up to 480no. residential units (including affordable housing), and a primary school (Use Class F1(a)) with new vehicular access points, car and cycle facilities and provision of public open space, sustainable drainage and landscaping works and full Planning Application (Phase 1) for the erection of 279no. residential units (including affordable housing) and the local centre (up to 1,000 sqm Use Classes E and F) with open space, associated vehicle, cycle and pedestrian access off Christmas Lane, upgrade of existing Public Right of Way, associated services and infrastructure, public realm, landscaping and SuDS. (Together with off-site highway works).

What would the anticipated lead-in time be to starting construction?

A hybrid planning application will be submitted to Medway Council at the end of March 2023. If planning permission is granted in Winter 2024, then construction on site is expected to start in March 2025.

What would be the anticipated annual build-out rate?

It is anticipated that approximately 60 homes a year will be delivered over a 12-year buildout programme.

How many years would construction take to complete the development?

Phase 1 Build start March 2025 Build end October 2029 Phase 2 Build start October 2029 Build end October 2035 Phase 3 Build start October 2035 Build end April 2037

Please indicate the approximate timescale for delivery:

Within 5 years, Within 6 to 10 years, Within 11 to 15 years

No answer given

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

A planning application could be submitted at a suitable point in time alongside the progression of the Local Plan. The site would likely come forward after 2030

What would the anticipated lead-in time be to starting construction?

c 1 year following approval of a planning application.

What would be the anticipated annual build-out rate?

Not known.

How many years would construction take to complete the development?

Approximately 5 years.

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
A small part of the east end of the site is covered by Flood Risk zone 3. It is considered that this can be overcome with good design - as the Council must consider to be the case having regard to the Hoo Development Framework proposals

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

After the Hoo Development Framework is confirmed

What would the anticipated lead-in time be to starting construction?

Immediate after permission

What would be the anticipated annual build-out rate?

Complete all within 1 year

How many years would construction take to complete the development?

1

Please indicate the approximate timescale for delivery:

Within 5 years, Within 6 to 10 years

Site ID: HHH31

Form submission ID: 299

Respondent ID: 148

Supplementary information submitted: Yes

Existing site

Site name: *Land east of Ropers Lane*

Site address: *Land east of Ropers Lane, Hoo St Werburgh, Medway, Kent, ME3 9LT*

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: ***Selected***

Please describe the proposed use: *As the site is sustainable and accessible with no overriding constraints, the site presents an opportunity for a sustainable extension to the east of the existing settlement of Hoo St Werburgh. The site should be considered as part of the wider Hoo St Werburgh Rural Town, which will deliver a highly sustainable community securing significant housing growth supported by infrastructure; employment opportunities; services and facilities as well as environmental enhancements (as set out in the draft Hoo Development Framework Masterplan, November 2022).*

Natural constraints

No, there are not constraints
n/a

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
The site comprises a mix of agricultural land, which has been assessed by a supporting Agricultural Land Classification Report (January 2023); this shows that the majority of the land is Grade 2 or 3a. The loss of such land would be considered in the context of the wider need to deliver new housing at sustainable locations.

Are ecological designations a development constraint?

Yes, there are constraints
The supporting Ecological Assessment (January 2023) sets out that there are several statutory designated sites in the vicinity of the site and that habitats within the site may be functionally-linked to the Medway Estuary and Marshes SPA and Ramsar site. Mitigation measures to avoid negative impacts upon the designating features of these sites would be considered as part of the wider SEMs proposals any future planning application, with particular regard to any added recreational pressures brought about by new development.

Is a tree or hedgerow a development constraint?

Yes, there are constraints
There are a number of existing trees/hedgerows within the site; these would be retained as far as possible, as part of any future planning application on the site.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
There is an area of medium/high flood risk along the north eastern edge of the site, which follows the extent of the watercourse and natural topography of the site. This would be retained with the development, forming part of the sustainable drainage strategy and a linear park linking footpath/cycle routes. Overland flow path for Surface Water would be co-ordinated within the masterplan forming part of the open space and SuDS strategy for any proposed development.

Are there any other development constraints relating to the natural environment?

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

Yes, there are constraints
A number of footpaths run through the site, including Saxon Shore Way. These would however all be retained, incorporated and enhanced as part of any future planning application. This is reflected by the concept proposals undertaken to date and the draft Hoo Development Framework Plan (November 2022).

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

Yes, there are constraints
There are a number of existing pipelines which would require an easement as part of the development. This is fully assessed within the supporting Utilities Consultation Note (September 2020).

Are overhead cables a development constraint?

Yes, there are constraints
There is a network of overhead power lines and pylons that run across the centre of the site proposed for residential development, connecting to the nearby power stations, with a 10m easement from the overhead lines and a clearance for the max swing plus 5.3m required either side of the cables. This is fully assessed within the supporting Utilities Consultation Note (September 2020), and could be accommodated by an appropriate easement. This is reflected by the concept proposals undertaken to date and the draft Hoo Development Framework Plan (November 2022).

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
The southern part of the site area is of value as part of the setting of Lancers Farmhouse, as well as the setting of the more distant buildings groups at White Hill farm and Cold Arbour. These would be considered as part of any future planning application. Please see the accompanying Heritage Assessment (January 2023).

Is archaeological interest a development constraint?

Yes, there are constraints
The supporting Heritage Assessment (January 2023) concludes that the site (including the wider Hoo site

as a whole) has an overall low to moderate potential for significant archaeological remains to be present within the site, albeit further site investigation might be deemed necessary as part of any future planning application.

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

Yes, there are constraints
HSE have shown an Explosives Safeguarding Zone adjacent to Stoke Road, HSE were contacted and provided general guidance and advised that ‘were the development to not include buildings of vulnerable construction, that there would unlikely be an impact on the nearby licensed explosives site’. However HSE will need to be consulted at a stage where the masterplan and development information is available. Vulnerable building definition (HSE); (a) a building of more than three storeys above ground or 12m in height constructed with continuous non-load bearing curtain walling with individual glazed or frangible panels larger than 1.5m2 and extending over more than 50% or 120m2 of the surface of any elevation; (b) a building of more than three storeys above ground or 12m in height with solid walls and individual glass panes or frangible panels larger than 1.5m2 and extending over at least 50% of any elevation; (c) a building of more than 400m2 plan area with continuous or individual glazing panes larger than 1.5m2 extending over at least 50% or 120m2 of the plan area; or (d) any other structure that, in consequence of an event such as an explosion, may be susceptible to disproportionate damage such as progressive collapse.

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The site is presently in agricultural use; however this use could wholly cease if development occurs.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

No

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

An outline planning application could be submitted at a suitable point in time alongside the progression of the Local Plan; this could be c.2030/2031

What would the anticipated lead-in time be to starting construction?

Following approval of an outline application, we expect there would be a 1?2-year lead-in time for the submission of Reserved Matters and for site mobilisation.

What would be the anticipated annual build-out rate?

An assumed consecutive delivery of c. 80 units per annum per each outlet.

How many years would construction take to complete the development?

c. 20 years.

Please indicate the approximate timescale for delivery:

Within 11 to 15 years

Site ID: HHH32

Natural constraints

No, there are not constraints
n/a

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No answer given
No answer given

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
The site comprises a mix of agricultural land, which has been assessed by a supporting Agricultural Land Classification Report (January 2023); this shows that the majority of the land is Grade 2 or 3a. The loss of such land would be considered in the context of wider need for employment development and the significance of this location to deliver that growth.

Are ecological designations a development constraint?

Yes, there are constraints
The supporting Ecological Assessment (January 2023) sets out that there are several statutory designated sites in the vicinity of the site and that habitats within the site may be functionally-linked to the Medway Estuary and Marshes SPA and Ramsar site. Mitigation measures to avoid negative impacts upon the designating features of these sites would be considered as part of any future planning application, with particular regard to any added recreational pressures brought about by new development.

Is a tree or hedgerow a development constraint?

Yes, there are constraints
Existing trees/hedgerows are present within and surrounding the site; these would be retained as far as possible as part of any future planning application on the site.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
There is an area of medium/high flood risk along the north east edge of the site, following the extent of the watercourse. The southern boundary is also subject to an area of medium/high extent of flood risk from the sea. This would be retained with the development, where possible forming part of the sustainable drainage strategy and a linear park linking footpath/cycle routes.

Are there any other development constraints relating to the natural environment?

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

*No, there are not constraints
n/a*

Is a public right of way a development constraint?

*Yes, there are constraints
An existing footpath runs through the southern part of the site.*

Is land contamination a development constraint?

*No, there are not constraints
n/a*

Is a pipeline a development constraint?

*Yes, there are constraints
There are a number of existing pipelines which would require an easement as part of the development. This is fully assessed within the supporting Utilities Consultation Note (September 2020).*

Are overhead cables a development constraint?

*Yes, there are constraints
There is a network of overhead power lines and pylons that run along the eastern site boundary, connecting to the nearby power stations, with a 25m clearance zone from the centre of each overhead line. This is fully assessed within the supporting Utilities Consultation Note (September 2020), and could be accommodated by an appropriate easement.*

Is a conservation area designation a development constraint?

*No, there are not constraints
n/a*

Is a listed building or a listed structure a development constraint?

*Yes, there are constraints
The site is in proximity to the setting of Lancers Farmhouse, as well as the setting of the more distant buildings groups at White Hill farm and Cold Arbour. These would be considered as part of any future planning application. See accompanying Heritage Assessment (January 2023).*

Is archaeological interest a development constraint?

*Yes, there are constraints
The supporting Heritage Assessment (January 2023) concludes that the site (including the wider Hoo site as a whole) has an overall low to moderate potential for significant archaeological remains to be present within the site, albeit further site investigation might be deemed necessary as part of any future planning application.*

Is noise or pollution from neighbouring uses a development constraint?

*No, there are not constraints
n/a*

Are there any other development constraints relating to the built environment?

*Yes, there are constraints
HSE have shown an Explosives Safeguarding Zone overlapping the site, HSE were previously contacted and the provided general guidance on the adjacent site (East of Ropers Lane) and advised that 'were the development to not include buildings of vulnerable construction, that there would unlikely be an impact on the nearby licensed explosives site'. However HSE will need to be consulted at a stage where the masterplan and development information is available. Vulnerable building definition (HSE); (a) a building of more than three storeys above ground or 12m in height constructed with continuous non-load bearing curtain walling with individual glazed or frangible panels larger than 1.5m² and extending over more than 50% or 120m² of the surface of any elevation; (b) a building of more than three storeys above ground or 12m in height with solid walls and individual glass panes or frangible panels larger than 1.5m² and extending over at least 50% of any elevation; (c) a building of more than 400m² plan area with continuous or individual glazing panes larger than 1.5m² extending over at least 50% or 120m² of the plan area; or (d) any other structure that, in consequence of an event such as an explosion, may be susceptible to disproportionate damage such as progressive collapse.*

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The site is presently in agricultural use; however this use could wholly cease if development occurs.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

No

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

An application is already progressing on part of the site for employment development, submitted in January 2023 (reference MC/23/0104), with permission anticipated in 2023. Further applications for the remainder of the site could be submitted at a suitable point in time alongside the progression of the Local Plan; this could be from c.2025.

What would the anticipated lead-in time be to starting construction?

Following planning permission, construction on the western part of the site (reference MC/23/0104) could progress in 2024.

What would be the anticipated annual build-out rate?

Circa 200,000 ft2 per year.

How many years would construction take to complete the development?

A total of 9 years.

Please indicate the approximate timescale for delivery:

Within 6 to 10 years

Natural constraints

No, there are not constraints
n/a

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
Brownfield cleared site

Is the landscape character a development constraint?

Yes, there are constraints
Site not part of National or Local designated landscape - but visible from River Medway.

Site adjoins River Medway

Present Outline Application informed by extensive LVIA and proposes comprehensive Landscape Strategy

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
Adjacent to the River Medway which is designated SSSI SPA and Ramsar

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
The majority of the Site is located within Flood Zone 3 . There are however existing defences present along the bank of the river comprising a mixture of earth, seawall, rock revetment and sheet piling, providing flood protection for events up to 1 in 1,000yrs probability. Comprehensive FRA accompanied recent Outline Application, which met with EA Approval and found that: • The majority of the Site is at low to very low risk of flooding from surface water sources, with a “low – medium” risk within Parcel 1; • The EA long term flood risk map indicates the entire Site is not within the maximum extent of flooding from reservoir failure and as such the risk of flooding from canals and other artificial structures is considered “low”; • Risk of ground water flooding on the Site is considered to be “low”; • The Site is at “low” risk from flooding from sewers; and • The Site is located in a Flood Warning Area characterised as “064FWT1Medway - Tidal River Medway and Medway Estuary”.

Are there any other development constraints relating to the natural environment?

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
The Site has already been cleared and largely remediated.

There is some remaining contamination at the site, but this is being remediated.

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

Yes, there are constraints
Existing National Grid infrastructure in western part of the Site.

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

Yes, there are constraints
Proximity to River Medway SSSI SPA Ramsar

Legal constraints

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: *Not selected*

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

No

Is mains sewerage supply available to the site?

No

Is an electrical supply available to the site?

No

Is a gas supply available to the site?

No

Is a public highway connection available to the site?

No

Is a landline telephone / broadband internet connection available to the site?

No

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is owned by a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Planning permission is in place.

What would the anticipated lead-in time be to starting construction?

Immediate.

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

1

Please indicate the approximate timescale for delivery:

Within 5 years

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Other

Have the owners of all parts of the site indicated support for its development?

No

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Not known

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

vaires - from 2023 over next 5-10 years

What would the anticipated lead-in time be to starting construction?

12 months

What would be the anticipated annual build-out rate?

50-100 per year from late 2020s

How many years would construction take to complete the development?

3-5 years

Please indicate the approximate timescale for delivery:

Within 6 to 10 years, Within 11 to 15 years

Site ID: HW6

Form submission ID: 239

Respondent ID: 399

Supplementary information submitted: Yes

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
In an area of Local Landscape Importance, please see accompanying statement

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No answer given
No answer given

Is a tree preservation order a development constraint?

Yes, there are constraints
There is ancient woodland to the north and northwest of the site but please see supporting statement

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

Yes, there are constraints
There is a public right of way through the site- please see supporting statement

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Feb-23

What would the anticipated lead-in time be to starting construction?

Circa 6 months from planning permission

What would be the anticipated annual build-out rate?

Circa 20-30 dwellings per year

How many years would construction take to complete the development?

Circa 3 years

Please indicate the approximate timescale for delivery:

Within 5 years

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

No, there are not constraints
n/a

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

Yes, there are constraints
At this point in time this is not a technical constraint but is an ownership issue because of the refusal of Medway Council to sell a small strip of land to allow the approved access connection for this approved development of 450 dwellings to North Dane Way. A ransom position does not exist for the alternative access for the 450 dwelling scheme that is currently being sought under MC/21/1296 and which was established in highway terms was technically acceptable under the MC/19/0336 scheme.

Is a public right of way a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

Yes
At this point in time this is not a technical constraint but is an ownership issue because of the refusal of Medway Council to sell a small strip of land to allow the approved access connection for this approved development of 450 dwellings to North Dane Way. A ransom position does not exist for the alternative access for the 450 dwelling scheme that is currently being sought under MC/21/1296 and which was established in highway terms was technically acceptable under the MC/19/0336 scheme.

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Enquiries received

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Already Under Consideration MC/21/1296

What would the anticipated lead-in time be to starting construction?

10 months

What would be the anticipated annual build-out rate?

100 dwellings per annum

How many years would construction take to complete the development?

4-5

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
Please refer to accompanying letter.

Whilst the Site is located in an ALLI this is not considered a constraint to development coming forward.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
A limited section of the northern boundary lies within flood zones 2 and 3. However, development can be located outside these areas. Please refer to covering letter for more details.

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is owned by a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

The Site is not constrained or complex. Due its relatively small size, a planning application can be submitted within 6 months following the completion of technical reports. Due to the Site’s limited size, it is proposed that a Full planning application is made.

What would the anticipated lead-in time be to starting construction?

Subject to discharge of planning conditions, development could commence within 4-6 months of planning permission being granted.

What would be the anticipated annual build-out rate?

50 homes per annum

How many years would construction take to complete the development?

Circa 2 yrs subject to planning and discharge of conditions.

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
Site is identified in the Local Plan as an Area of Local Landscape Importance.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Not known

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Q2 2023

What would the anticipated lead-in time be to starting construction?

9 months

What would be the anticipated annual build-out rate?

50

How many years would construction take to complete the development?

5

Please indicate the approximate timescale for delivery:

Within 5 years, Within 6 to 10 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
According to the Agricultural Land Classification - Provisional record available via MAGIC maps the site is located within an area of Grade 1 agricultural land. It should be noted however that the land in question is not in use for farming and has not been farmed for decades. The condition of the land is 'fallow'

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

A planning application could be submitted within 12 months of the site's allocation in the New Local Plan being adopted.

What would the anticipated lead-in time be to starting construction?

6 month lead-in to deal with Section 278

What would be the anticipated annual build-out rate?

30 homes per annum

How many years would construction take to complete the development?

3

Please indicate the approximate timescale for delivery:

Within 5 years

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
There are solution features present on site. A geographical investigation has been undertaken and the locations identified. The development can be planned around the isolated locations and a suitable engineering solution provided.

Is the landscape character a development constraint?

Yes, there are constraints
The land is within an Area of Local Landscape Importance. This is a designation which covers much of the District. As part of the Vision Framework Document which supports this submission, a Landscape Character Review has been completed which forms the basis by which the proposals have been developed. It is our view that the site can be developed whilst respecting the key characteristics of this landscape.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
An initial assessment has been undertaken and identifies that the majority of the site is likely to be Grade 3b based on previous uses. There is a possibility that a small area of the site could be Grade 1 and 2. Whilst the site can be classed as Best and Most Versatile (BMV), all agricultural land to the north and east of Gillingham is classified as BMV and therefore this should not be a barrier to future development

Are ecological designations a development constraint?

Yes, there are constraints
Phase 2 surveys have been completed and these identified that habitats of elevated value are largely contained within the hedgerows and mature trees. Appropriate mitigation can be provided to ensure suitable protection to existing habitats and there are also extensive opportunities for biodiversity enhancement through green infrastructure provision on site.

Is a tree or hedgerow a development constraint?

Yes, there are constraints
There are hedgerows and trees within the site however these are largely limited to the boundaries. The proposals would seek to limit any loss and the proposed new country park and areas of open space will provide opportunities for significant new planting.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

Yes, there are constraints
There is a 1500mm trunk foul water sewer which crosses the site with an associated 13m easement which is to be left free from development. This pipe can be accommodated within the development and therefore is not a constraint to development.

Are overhead cables a development constraint?

Yes, there are constraints
There are existing overhead cables which cross the site but these will be grounded or diverted as part of the development.

Is a conservation area designation a development constraint?

Yes, there are constraints
Lower Twydall Conservation Area lies adjacent to the site. Appropriate buffers will be provided to this area to retain its distinctive character as a defined hamlet and to respond to the setting of the listed buildings as appropriate.

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
There are no listed buildings within the site however there are a number of listed buildings located on Lower Rainham Road and Eastcourt Lane in relative proximity to the Site. Buffers will be provided within the site to respond to the setting of the listed buildings as appropriate.

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Within 6 months of achieving an allocation in an adopted Local Plan

What would the anticipated lead-in time be to starting construction?

Construction will start within 1 month of achieving the necessary Reserved Matters consents and discharge of conditions

What would be the anticipated annual build-out rate?

60 dwellings per year

How many years would construction take to complete the development?

6 - 7 years

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
Gillingham Riverside Area of Local Landscape Importance (ALLI) and Lower Rainham Farmland Landscape Character Area (LRFCA)

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
Site includes Grades 1, 2 and 3a Best and Most Versatile Agricultural Land

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No answer given
No answer given

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints

Is a conservation area designation a development constraint?

Yes, there are constraints
Lower Twydall and Lower Rainham Conservation Areas are in proximity to the site

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
There are listed buildings in proximity to the site

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Enquiries received

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Within 2-3 years

What would the anticipated lead-in time be to starting construction?

No answer given

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

No answer given

Please indicate the approximate timescale for delivery:

Within 5 years, Within 6 to 10 years

Site ID: RN10

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
Grade 1

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No answer given
No answer given

Is a tree preservation order a development constraint?

No answer given
No answer given

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
Chapel House Grade II on boundary of site

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

1-5 years

What would the anticipated lead-in time be to starting construction?

1 year

What would be the anticipated annual build-out rate?

25 units per annum

How many years would construction take to complete the development?

2

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
There would be some adverse effects on local landscape character (as is largely inevitable for any development of a green field site). However, this harm would be at a relatively low level, would be felt over a limited area around the site and would reduce further over time. Please see attached cover letter for further details.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
Grade 1 ? However the parcels are relatively small, not connected to a large farm and it would not be economic to attempt to farm them.

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
Lower Rainham Conservation Area is located to the west of the site.

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
The site is adjacent to 'Bloors Place' (Grade II*), 'Garden walls to south and east of Bloors' & 'Range of outbuildings including Cart Lodge and Granary west of Bloors Place' (Grade II). However, the land is separated by a high wall and substantial vegetation such that a sensitive development would not harm the heritage value of the assets.

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is owned by a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

At appeal

What would the anticipated lead-in time be to starting construction?

6 months

What would be the anticipated annual build-out rate?

complete within 12 months

How many years would construction take to complete the development?

1 year

Please indicate the approximate timescale for delivery:

Within 5 years

No answer given

Other relevant planning history:

The site has previously been the subject of planning applications for residential development, but as part of a much larger parcel of land. This included the parcel to the north, up to the railway line - which is now the site of the Leigh Academy and associated playing fields and pitches. The first application for the larger site was in 2014 (MC/14/3784). This was for a residential development of up to 200 dwellings with landscaping, open space and associated ancillary works. This was later dismissed at appeal (appeal against the non determination of Medway Council) in August 2016 (appeal ref: APP/A2280/W/15/3012034). A resubmission application (Outline Planning Application MC/15/2731) with some reserved matters (Appearance, Landscaping, Layout and Scale) for residential development of up to 190 residential dwellings (including a minimum of 25% affordable housing), planting and landscaping, informal open space, surface water attenuation, a vehicular access point from Otterham Quay Lane and associated works) was submitted in July 2015, and refused in October 2015. Since this time, the site to the North (formally part of the larger appeal site) has been approved for the development of Leigh Academy School (MC/19/2530), a development for 8 new homes on Seymour Road has been approved (MC/18/3577), and an urban extension of up to 300 dwellings for a 10.75ha site to the north of the School Scheme has been approved (MC/16/2051). In terms of this site, following pre application advice meetings with Medway Council, a full planning application was subsequently submitted by Bellway Homes Ltd for 66 dwellings on the site in October 2021 (ref: MC/21/3125). Through post submission discussions, the no. of homes was reduced from 74 to 66, with the open space in the centre of the site significantly expanded. This application was recommended for approval by Officer's, however overturned by Members at planning committee in October 2023 and subsequently refused on highways and heritage grounds. This application is now at appeal and an Inquiry is due to be held in April 2023.

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
Landscape character is not considered to be a constraint to development that cannot be mitigated or minimised through development on site. The site is not covered by any National or regional landscape designations, however it does fall within the Meirscourt/ Meresborough Area of Local Landscape Importance (ALLI). A local landscape designation, which identifies areas which should provide an attractive setting to the urban area and surrounding villages. As part of application 21/3125, a full Landscape Visual Impact Assessment has been undertaken by Murdoch Wickham, which includes an assessment on of landscape character. This confirms the Site’s landscape character is influenced by the urbanising elements of Leigh Academy, residential properties on Moor Street, Otterham Quay Lane and Seymour Road, and by the industrial units and properties adjacent to the south eastern boundary on Moor Street. It states at a National level, the landscape character of the Site and the surrounding area have been studied and it is considered that the Proposed Development is “sympathetic to local character and history, including the surrounding built environment and landscape setting”. It goes onto state that the Proposed Development has been designed and landscaped to minimise harm to the landscape character and function of the ALLI. The contribution of the wider site to the green buffer function of the ALLI is already considered to be compromised by the School Scheme and that, on completion, the Proposed Development would not result in any further erosion of the special qualities or objectives of the ALLI. It states the Site’s self-contained landscape character would be changed rather than the overall character of the wider rural landscape to the south. Albeit that the Proposed Development, by replacing the existing field with housing would not enhance the landscape or reinforce the rural characteristics of the wider area, neither would it damage or detract from it. Overall it is considered that the Proposed Development can be accommodated without any unacceptable adverse effects on the prevailing landscape character. The Council’s committee report in relation to landscape character and function confirms, ‘the site is not functioning well in this respect, since it has (relatively recent) built development to the north (the Leigh Academy and housing further north of that), built development to the west (housing) and also to the east (commercial). The functioning of the site as a ‘restrictor’ to development is therefore limited by these factors, albeit it is still open space within the ALLI. The landscape character is therefore impacted upon by existing built development which surrounds the site on three sides’. The Council goes onto conclude that there is some harm in respect to the ALLI designation, the character of the site would change. However due to the self-contained nature of the site and its separation from the wider countryside to the south, the proposed development would not introduce suburban residential forms to an open rural landscape. The site’s self-contained landscape character would be changed rather than the overall character of the wider rural landscape to the south. The additional built form would also be experienced within the context of the school scheme. Overall it is therefore considered that the harm to the ALLI overall is minimised and that the benefits outweigh any harm caused as a result of the proposal.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
Development on site would result in the development of Grade 2 agricultural land. However, the previous appeal Inspector determined that the loss of best and most versatile agricultural land would be outweighed by the public benefits of the proposal. The land has not been used for farm and food production for a significant period of time, the site is relatively small and surrounded by existing residential development and school uses. It is therefore considered that its loss to housing would not have a detrimental impact on the local or national agricultural production.

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
There are no designated heritage assets within the site boundary. To the south-east of the site is the western boundary of the Moor Street Conservation Area. A Heritage Report accompanies application MC/21/3125 and demonstrates that the proposals would only cause a de minimis level of harm to the Conservation Area. It is therefore not considered a constraint to development.

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
There are no designated heritage assets within the site boundary. To the south of the site is the Grade II Listed Westmoor Cottage and south east of the site is the western boundary of the Moor Street Conservation Area and a small number of Grade II Listed Buildings are located within this, including the Grade II Listed West Moor Farmhouse and Grade II East Moor Street Cottages. Heritage Report accompanies application MC/21/3125 and demonstrates the proposals would result in no harm to West Moor Cottage and West Moor Farm House, the closest assets to the Site. The Planning Committee report further records that Officers conclusions on the whole are that the level of harm is at the lower end of 'less than substantial' to all the identified heritage assets. The presence of Listed Buildings is therefore not considered to be a constraint to development, subject to the sensitive development of the Site as proposed.

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

An application has already been submitted

What would the anticipated lead-in time be to starting construction?

4-6months ? subject to planning and discharge of planning conditions.

What would be the anticipated annual build-out rate?

50-60 dwellings per annum

How many years would construction take to complete the development?

Subject to conditions being discharged and allowing for site prep 18 months

Please indicate the approximate timescale for delivery:

Within 5 years

Site ID: RN29

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

No answer given

Is mains sewerage supply available to the site?

No answer given

Is an electrical supply available to the site?

No answer given

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

No answer given

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client's interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Submitted July 2021

What would the anticipated lead-in time be to starting construction?

3 months from Planning Permission

What would be the anticipated annual build-out rate?

25 units per annum

How many years would construction take to complete the development?

No answer given

Please indicate the approximate timescale for delivery:

Within 5 years

Site ID: RN33

Form submission ID: 261

Respondent ID: 417

Supplementary information submitted: Yes

Existing site

Other / Sui generis: **Selected**
Please describe the proposed use: *To secure offsetting/off site biodiversity net gain contributions in coordination with future development opportunities emerging with the new Local Plan.*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
Former landfill site.

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
Former landfill site.

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

No answer given

Is mains sewerage supply available to the site?

No answer given

Is an electrical supply available to the site?

No answer given

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

No answer given

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Site is owned by a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

A Biodiversity Offset Management Plan (BOMP) will be prepared which demonstrates how the above enhancements can be delivered over a 30 year management period. The BOMP will be made available on agreement of management of the site by a third party.

What would the anticipated lead-in time be to starting construction?

N/A

What would be the anticipated annual build-out rate?

N/A

How many years would construction take to complete the development?

N/A

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No answer given
No answer given

Is the landscape character a development constraint?

Yes, there are constraints
AONB & Strategic Gap

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

Yes, there are constraints
Land to the norther east/east is designated as Ancient Woodland but does not extend into the proposed site. The only constraint therefore is to maintain a 15m buffer to any development

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

Yes, there are constraints
There is a water main through the site running under the M2 however, subject to compliance with easements this is not a strict constraint per se.

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
Edge of town development demands sensitive boundary treatments to create a durable landscape boundary to the countryside.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No answer given
No answer given

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

Yes, there are constraints
Footpath GB12 runs along northern boundary of site.

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

2023

What would the anticipated lead-in time be to starting construction?

2024

What would be the anticipated annual build-out rate?

Completed 2025

How many years would construction take to complete the development?

Completed 2025

Please indicate the approximate timescale for delivery:

Within 5 years

No answer given

Other relevant planning history:

The below summarises the planning history. However, it must be emphasised that the applications and Appeal decisions below relates to only discrete parts of the Site. It does not consider the wider masterplan now being promoted, which delivers strategic benefits and a holistic design approach responding to previous reasons for refusal, in respect of the development at Mierscourt Road and Orchard Kennels. The Appeal at Land North of Moor Street and East of Otterham Quarry Lane, remains to be determined. MC/19/0171 Outline planning application with some matters reserved (appearance, layout, scale and landscaping) for 50 Dwellings with new access. Resubmission of MC/18/2047 Refusal 03/06/2019 Ref: APP/A2280/W/19/3242289 As above Dismissed 11/12/2020 MC/18/2047 Outline planning application with some matters reserved (appearance, layout, scale and landscaping) for 50 Dwellings with new access. Refusal 25/10/2018 Ref: APP/A2280/W/19/3223080 As above Dismissed 22/01/2020 MC/20/1705 Outline planning application with some matters reserved (access, appearance, landscaping and scale) for the development of up to 66 residential dwellings with associated parking and landscaped areas - Re-submission of MC/19/0188 Refusal 05/03/21 Ref: APP/A2280/W/21/3274932 As above Dismissed 25/04/22 MC/21/3125 Full planning application for the development of 66 dwellings (including 25% affordable housing) together with open space, landscaping, drainage, access, parking and associated works. Refused 24/10/22 APP/A2280/W/22/3310119 As above To be determined

Other / Sui generis: *Not selected*

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
The Site is not subject to any National landscape designations. The Site lies within the Meirscourt/Meresborough ALLI, as identified in the Adopted Local Plan (2003). However, as demonstrated in the supporting Masterplan document, the quality of the landscape has been identified as low quality. The Masterplan Document and masterplan within, takes a landscape led approach and has been informed by landscape advice which has considered the overall landscape quality of the Site and identified opportunities to enhance it. This includes retaining and reinforcing tree and hedgerow belts. Orchards are also proposed to be retained as a community asset and identified as an opportunity to make the development distinctive and grounded in its context. Allied to this, the masterplan incorporates appropriate buffers, transitioning the development into the countryside, preserving key views and including opportunities to enhance the PROWs that run through the Site, improving users experience and access to the wider area.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

Yes, there are constraints
High level mapping identifies the site as comprising the Best and Most versatile Land (BMV). Further work is being undertaken to determine if this information is accurate. Notwithstanding, a very significant proportion of Medway comprises BMV land. It is therefore inevitable that development will have to take place on high quality agricultural land to meet the Council’s identified housing requirement, which is significant. However, the Site is made up of a patchwork of smaller sites which experience varying degrees of usage, some with a semi derelict quality and not all in use for agriculture. The Site is therefore not intensively farmed and does not make a significant contribution towards food production, unlike large areas of Hoo, which are proposed for development. Its loss is therefore considered to be outweighed by the need to plan for new sustainable developments to address housing needs.

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

Yes, there are constraints
There are trees and hedgerows bounding and running within the Site. There are also orchards which are identified as Priority Habitats. The Masterplan Document and masterplan within, takes a landscape led approach and has been informed by landscape advice which has considered the overall landscape quality of the Site and identified opportunities to enhance it. This includes retaining and reinforcing tree and hedgerow belts. Orchards are also proposed to be retained as a community asset and identified as an opportunity to make the development distinctive and grounded in its context.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
The are six Grade II Listed Buildings within the immediate vicinity of the Site and Moor Street Conservation Area. The attached Masterplan Document demonstrates that the Site can be sensitively developed having regard to these assets, with development appropriately set back, preserving their settings.

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
The are six Grade II Listed Buildings within the immediate vicinity of the Site and Moor Street Conservation Area. The attached Masterplan Document demonstrates that the Site can be sensitively developed having regard to these assets, with development appropriately set back, preserving their settings.

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

Yes, there are constraints
The development is influenced by noise from the A2. As set out in the supporting Masterplan Document, the influence of noise from the A2 has already been considered and determined not to be a constraint to development, subject to the inclusion of appropriate mitigation measures.

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

The accompanying Masterplan Document has already been informed by technical assessments and further assessments are currently underway. It is proposed that a hybrid planning application can be submitted within 12 months. It is proposed that a first phase of circa 250 homes would be submitted in Full to aid delivery.

What would the anticipated lead-in time be to starting construction?

Subject to discharge of planning conditions, development could commence within 6-8 months of planning permission being granted.

What would be the anticipated annual build-out rate?

75 homes per annum

How many years would construction take to complete the development?

Circa 10 yrs subject to planning and discharge of conditions

Please indicate the approximate timescale for delivery:

Within 5 years

No answer given

Other relevant planning history:

PLEASE NOTE: Existing Floorspace figures available on request - boxes above do not allow us to input more than 10,000 sqm. During the consideration of the Chatham Waters Scheme (MC/11/2756) the Council were repeatedly reassured by the Applicant (Peel Land & Property) that if they were allowed to shut down one quarter of the working docks, which was against the Council's policies, they would be able to pay to maintain the existing lock gates and ensure the long-term protection of the remainder of the working docks. This reassurance was most recently mentioned again in 2018 as part of an application to discharge a condition relating to the Chatham Waters planning consent.

Proposed development

What is the proposed land use?

General industry (Class B2): **Selected**
Gross internal area (sqm): 10000

Storage and distribution (Class B8): **Selected**

Please describe the proposed use: *n/a*

Waste management: *Not selected*
Please describe the proposed use: *n/a*

Other / Sui generis: **Selected**
Please describe the proposed use: *PLEASE NOTE - The area above requested for proposed development - Class B2 - will not allow us to enter a figure larger than '10,000' - the approximate figure is 97,500 sqm of industrial floorspace. SPPARC Architects have prepared a draft industrial Masterplan for the site which was presented at a House of Commons meeting on 29 June 2022. This draft Masterplan shows how the site can continue operating successfully retaining the existing businesses already on site thereby safeguarding around 800 jobs. The existing port facilities can be upgraded including the upgrading of the lock gates so that they can allow the number of port movements to return to the level for which they were originally designed, which would further increase the contribution the site can make to the local economy through*

employment and clustering benefits associated with dock related activities, indirect employment (supplying goods and services to companies engaged in dock activity) and induced employment (associated with expenditure resulting from those who derive incomes from docks). It also has the potential to be developed to deliver additional, modern flexible industrial space (Class B2 and Class B8 type uses and Class E) where the dock facilities are retained. The continuation and expansion of Chatham Docks as an employment site is sustainable and with the proposed investment planned will become even more important to the local economy and will bring about improvements to the local environment too. The emerging River Strategy by SQW Consultants places a strong focus upon use of the river for transport and the improvements to the local economy. For example, with potential links across the estuary to the Kingsnorth site. If we are to have sustainable development within Medway then the retention of Chatham Docks for employment is a fundamental part of this strategy. Chatham Docks Four Centuries There is extensive further information in the online Chatham Docks Four Centuries document: 'Chatham Docks: After four centuries, how bright is the future for one of Britain's most historic ports?' Hard copies of the independent research reports that make up the Chatham Docks Four Centuries document, can be made available upon request. They have already been posted to a large number of Medway Councillors.

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
The site falls within Flood Zone 3 which makes it unsuitable for ground floor residential uses but not for the proposed continued commercial uses which we are seeking through this allocation.

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
There are no constraints for continued and expanded industrial use. The site has been in long term dock related industrial use, and is suitable for continued industrial use. However, it would be a major constraint for any residential use. No residential development is proposed and in any event such use would not be allowed under existing long standing strong planning policy.

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

Yes, there are constraints
There are no development constraints relating to the built environment for continued and expanded

industrial use. The site is a designated Existing Employment Area where employment uses are protected, and encouraged, This would be a major constraint for non industrial uses, such as residential. Extracts from Medway Local Plan 2003, and Core Strategy 2012 (the Core Strategy submitted for Examination): MEDWAY LOCAL PLAN 2003 Existing Employment Areas 4.5.1 Priority will generally be given to the retention of existing employment uses, provided that local amenity is not jeopardised. The council will encourage the improvement of such areas to enhance both the image and efficiency of companies and the environment. The latter is particularly important to the way potential business investors perceive Medway. Their accessibility by modes of transport other than car is also important and will be encouraged. Therefore, proposals for new development and extensions which are likely to generate further employment will be permitted in the areas listed below, subject to the particular characteristics of each site. A number of existing employment areas have been developed for a variety of office, industrial and warehousing uses. Accordingly, Business Uses (Class B1) and where appropriate, general industrial uses (Class B2) and storage and distribution uses (Class B8) will be permitted on the following sites for the reasons set out: ... (ii) Chatham Port: The port deals with the handling and distribution of materials, together with some ship repairing. The continuing development of the port is covered in detail in policy ED9. 4.5.2 The local plan seeks to ensure that sufficient land is identified to enable a variety of employment opportunities to come forward. It also aims to limit the release of fresh land for development outside the urban area. The council will seek to retain appropriate existing sites for employment use. More specifically, given the scale and nature of provision made here and elsewhere in the plan, the council sees no case for retailing and leisure development to be allowed on land identified for business, industrial or warehousing uses. POLICY ED1: EXISTING EMPLOYMENT AREAS In the following Employment Areas, as defined on the proposals map, development will be permitted only for : (A) Business (Class B1) development at: (i) Firmstart Estate, Twydall (ii) Second Avenue, Luton (iii) Vicarage Lane, Hoo. (B) Business (Class B1), general industry (Class B2) and storage and distribution (Class B8) at : (i) Courteney Road, Gillingham (ii) Gads Hill/Danes Hill, Gillingham (iii) Gillingham Business Park (iv) Pier Road, Gillingham (v) Railway Street Industrial Park, Gillingham (vi) Formby Road, Halling (vii) Fort Bridgewood, Chatham (viii) Frindsbury Peninsula (ix) Kingsnorth (x) Laker Road Industrial Estate (xi) Rochester Airfield (xii) Lordswood Industrial Estate (xiii) Beechings Way (excluding the Mixed Use Areas) (xiv) Isle of Grain/Thamesport (xv) Hopewell Drive, Luton (C) General Industry (Class B2) and storage and distribution (Class B8) at : (i) Chatham Port. (D) Business (Class B1) and general industry (Class B2) at: (i) Former Depot, Otterham Quay Lane. Proposals for development on the above sites resulting in the loss of existing industrial, business or storage and distribution development to other uses will not be permitted. Chatham Port 4.5.21 The Mersey Docks and Harbour Company owns the commercial port which covers an area of approximately 58.7 hectares of the former Chatham Naval Dockyard and includes Basin No.3, which has access to the River Medway. Vehicular access to the site is directly off the Medway Towns Northern Relief Road. Since its establishment in 1984 the port has significantly increased the volume of traffic that it handles, although expansion was limited by the restricted nature of the access arrangements to the site prior to the recent completion of the Relief Road. The port is best known for the handling of timber and paper related products, but also offers ship repairing facilities. . 4.5.22 The owners have expressed their interest in expanding the port operation and further developing facilities. The spare capacity that currently exists could be used to accommodate cargo-handling capacity that is lost as a result of changes further upstream. The council will support the continued operation and future expansion of the port operation at Chatham... POLICY ED9: CHATHAM PORT Port related development and an expansion of the commercial port at Chatham, as defined on the proposals map, will be permitted subject to the provisions of policy T7 and the enhancement of the setting of the Medway Towns Northern Relief Road. CORE STRATEGY 2012 POLICY CS24: Transport and Movement Over the plan period: • The highway system will be proactively managed to minimise congestion, through the operation of urban traffic management and control systems, the development of a quality bus network and selective junction improvements in congestion/air quality hotspots • Car growth will be balanced by increasing the capacity, reliability and quality of public transport through: o The introduction of Fastrack style services on major urban and inter urban routes, including to and from Lodge Hill o Four potential park and ride facilities at Horsted, Whitewall Creek, Strood and between Gillingham and Rainham,

plus park and coach facilities o Improved interchange facilities associated with the railway stations and in the town centres o Improved main line railway stations at Strood, Rochester, Chatham and Gillingham o High quality real-time information and cross mode ticketing systems. • Car parking in the town centres, especially in Chatham, will be rationalised (though not reduced in scale) where appropriate into multi storey facilities available for public use. Contributions will be sought towards new town centre car parking in lieu of reduced provision on individual sites • Lower car parking standards will be considered in areas with already or potentially good public transport availability to provide a realistic option to private car use • All significant development proposals will be subject to an agreed transport assessment, which includes an assessment of the potential to encourage modal shift away from private car use • Walking and cycling networks will be extended, catering particularly for local journeys but also sub-regionally, including in conjunction with new developments • Existing wharf and port capacity will be safeguarded in order to meet national and regional capacity requirements and to encourage the local transportation of goods by water • A network of piers and landing places will be safeguarded to facilitate the introduction of water bus/taxi services along the urban waterfront, linking visitor and other attractions and providing capacity for vessels • The Council will continue to work with the operator of Rochester Airport to objectively consider the future of the general aviation facility, bearing in mind its co-location with a strategic employment opportunity. Extract from Core Strategy just before: Policy CS25: The River Medway Chatham Docks 9.18 Chatham Docks caters for smaller vessels – up to 8,000 tonnes – with lock gates controlling access from the Medway. The site and associated facilities need reinvestment but there is every indication that it has a long term commercial role, complementing the larger ports catering for deep sea traffic and handling vessels too large for local wharves and jetties. Accordingly it is intended that it should continue to be safeguarded. Policy CS25: The River Medway The River Medway is strategically significant in terms of its employment, environmental, transport and leisure importance. Accordingly: • Along the urban waterfront mixed use redevelopment will be promoted in order to create safe, high quality environments, provide new homes and jobs, leisure and social infrastructure facilities with public spaces as focal points, a riverside walk and cycle way and increased public access to the river • Greater use will be made of the river. Wharves and port capacity at Chatham Docks and Thamesport will continue to be safeguarded for the transshipment of freight, including waste and aggregates and other materials • Existing infrastructure that provides access to the river and the foreshore, such as piers, jetties, slipways, steps and stairs will be protected unless redevelopment would result in an improvement. New facilities, including piers for river taxis, will be encouraged where appropriate. • Leisure activities on and along the river will be supported as long as they will not harm the environment or natural ecosystems • The river will be protected in its own right, as a key landscape feature of natural beauty. • Proposed development will be expected to either maintain or improve water quality and minimise air, land and water pollution. • The Council will seek contributions from developers for the maintenance and improvement of the river, where appropriate.

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
Yes – if non industrial uses were to be proposed in the Docks. All tenants are industrial businesses and wish to continue to operate within Chatham Docks. A significant area of the site is within the protection of the Landlord and Tenant Act. However, there are no tenancy constraints for the proposed continuation of the existing industrial use of the Docks. Peel Land & Property previously wanted to close the Docks and instead build residential tower blocks.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Leasee

Have the owners of all parts of the site indicated support for its development?

No

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

The existing docks are thriving and it is a vibrant working docks - the current dock uses on site are viable, and it has a very promising future. There has been extensive local public consultation with St Mary’s Island, at the nearest local retail centre, with Local Councillors and a presentation given in Parliament. There has been strong support for the continued use of this site as a working and growing docks, and the team will be liaising with the Council on the best time to submit a planning application for further growth.

What would the anticipated lead-in time be to starting construction?

There has been strong support for the continued use of this site as a working and growing docks, and the team will be liaising with the Council on the best time to submit a planning application for further growth.

What would be the anticipated annual build-out rate?

There has been strong support for the continued use of this site as a working and growing docks, and the team will be liaising with the Council on the best time to submit a planning application for further growth.

How many years would construction take to complete the development?

There has been strong support for the continued use of this site as a working and growing dock, and the team will be liaising with the Council on the best time to submit a planning application for further growth over the life of the next Local Plan.

Please indicate the approximate timescale for delivery:

Within 6 to 10 years

Current planning permission(s), including reference numbers:

MC/11/2756 - Outline application with some matters reserved (appearance/landscaping/layout/scale) for a mixed use development comprising up to 179,297m² of floorspace, incorporating Employment Uses (B1 and B2), Residential (C3 - up to 950 units), Student Accommodation (Sui Generis), Hotels (C1), Leisure, Conference, Events and Education Facilities (D1 and D2), Retail Uses (A1-A5) including Superstore, an Energy Centre, Petrol Filling Station and associated open space, access, parking and infrastructure (Approved March 2013) MC/21/0210 - Use of land for temporary car park with associated boundary fencing and enclosures, hardstanding, lighting, and associated works (Approved 24th March 2021)

Other relevant planning history:

Chatham Docks has operated as a commercial port since 1985, before which it formed part of the far larger naval dockyard which the government closed in 1984. Being a naval legacy site, the infrastructure is old and requires considerable maintenance. Since circa 2008 the site has been flagged for regeneration and redevelopment in various call for sites consultations, including by Gillingham FC as a possible relocation site. In 2013, outline planning permission was granted [ref MC/11/2756] for Chatham Waters on a 14.6 Ha parcel of the site. This permission for a large mixed use development comprising employment, retail, residential, education and other uses and enabled a £7m investment to refurbish the historic lock gates to keep them operational until the wider leases expire in 2025. It also funded significant new road infrastructure that was designed with capacity to accommodate development across the whole docks site and additional flood defences. Chatham Waters is still being developed and has already delivered a 6,500m² Asda Superstore; a 5,500m² University Technical College with 270 students enrolled (and increasing); a Marston's pub/restaurant, further retail space alongside 391 homes for open market sale and rent; 1.6Ha of new public realm including waterfront promenade and parkland on former brownfield land. Also, currently under construction or in the pipeline with outline planning permission is an additional 237 affordable homes, comprising a mix of discounted rent and shared ownership; a 74-bedroom care home; event space and circa 320 more residential units and public realm as the development is completed. Since Chatham Docks Industrial Estate was put forward in the last 'call for sites' in 2017 and 2019, the landowner has continued to engage with key stakeholders, the surrounding community and councillors as the development at Chatham Waters has taken shape. The wider regeneration opportunity of the commercial docks has been planned for many years to coincide with the decommissioning of the port in 2025 due to the anticipated cost of replacing the lock gates which are estimated to cost well above £30 million. At this point, the port operator lease will end along with the existing tenant leases. Work is ongoing to assist existing commercial occupiers at Chatham Docks Industrial Estate to relocate to local suitable alternative sites to retain jobs and, where river access is required, to alternative docks along the Medway. One tenant has already relocated to Kingsnorth Commercial Park and another is in discussion to relocate to Sheerness to help with the planned expansion of its business. An Aecom report prepared for the Council confirms that there is capacity on alternative sites within Medway to accommodate the relocation of all existing occupiers.

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
The ground is likely to need remediation given its past use as a naval and then commercial dock.

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

Yes, there are constraints
There are no known on site ecological constraints although it lies adjacent to the river Medway which has various environmental and ecological designations.

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
Common with all the land alongside the river Medway, most of the site falls within Flood Zones 2 and 3 so flooding is a development constraint and flood defences will need to be constructed as they have already been for the initial phases of development at Chatham Waters.

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

No, there are not constraints
n/a

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
The site is likely to have some contamination that will need remediation as a part of its development and will therefore be a constraint that will need to be addressed.

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

Yes, there are constraints
Part of the site is immediately adjacent to existing residential development on St Mary’s Island and the noise and pollution generated by the existing commercial activity at the docks is a source of regular complaints. Once constructed, the proposed regeneration of the site will remove this existing conflict between adjacent residential and industrial uses.

Are there any other development constraints relating to the built environment?

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The site is in single ownership, but most parts of the land cannot be delivered until after 2025, when the port operation will cease and existing leases expire. There are currently some tenancy constraints, and the site owner has been working with existing occupiers as well as Medway Council and Locate Kent to assist in identifying opportunities for relocation of existing occupiers in the run up to 2025 to help employment retention.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is owned by a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

2024

What would the anticipated lead-in time be to starting construction?

2 years: If planning permission could be secured in 2024, that would allow for condition discharge and phased site clearance, remediation and flood defence works as the land becomes available once occupiers relocate, in 2025/26.

What would be the anticipated annual build-out rate?

The site would take approximately 15-20 years to deliver 3,000 dwellings at an average of 150-200 per annum.

How many years would construction take to complete the development?

15-20 years

Please indicate the approximate timescale for delivery:

Within 5 years, Within 6 to 10 years, Within 11 to 15 years, 15 years +

Natural constraints

No, there are not constraints
n/a

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
The site is not covered by any national or regional landscape designations however it does lie within an Area of Local Landscape Importance. However this is not an absolute constraint to development that cannot be mitigated or minimised. There is clear potential for developing the site in a sensitive way that delivers a more sensitive transition between the hard and dense urban edge and the open countryside. Furthermore, this transition has even greater scope to be controlled by virtue of the firm boundary provided by the A289, which has a significant impact upon the wider landscape. Please see supporting statement for further information.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

Yes, there are constraints
The site is considered to be of low ecological value and so this would not present a constraint to development. However any application would be accompanied by the necessary ecology surveys. The site does not form part of any ecological designation however Natural England guidance advises it does lie within a SSSI risk zone. Further assessment on the impact on habitats would therefore accompany an application. This is however not a constraint which would preclude development.

Is a tree or hedgerow a development constraint?

Yes, there are constraints
Existing trees and hedgerows do lie within and around the border of the application site. However this is not an absolute constraint to development. Future development would be informed by the necessary tree surveys and reports and maintain existing hedgerows and trees where possible. No Tree Preservation Orders lie on or adjacent to the application site. Please see supporting statement for further information.

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

Yes, there are constraints
Two public rights of way intersect the site. These however can be incorporated into the proposed development and would not present a constraint to development.

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client's interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

If the site was allocated for residential development an application could be submitted within 3-4 months.

What would the anticipated lead-in time be to starting construction?

Construction could commence following a decision being issued and the discharge of pre-commencement conditions shortly after.

What would be the anticipated annual build-out rate?

50 in the first year and then 75 dwellings per annum thereafter.

How many years would construction take to complete the development?

10 (approximately)

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

Yes, there are constraints
We anticipate abnormal costs including ground contamination remediation and archeology investigations; costs have been assumed within the indicative appraisal of the scheme.

Is the landscape character a development constraint?

Yes, there are constraints
We will consult Historic England on the impact of development from protected views including Rochester Castle and All Saints Church.

We will establish the requirement for an Environmental Impact Assessment at the pre application stage.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

Yes, there are constraints
A Transport Assessment will indicate the junction improvements required to access the site.

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

Yes, there are constraints
Grounds investigations to be undertaken on land that was not raised as part of the flood defence works.

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
The site will need to be considered alongside the Historic Rochester.

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
The site will need to be considered alongside the Historic Rochester.

Is archaeological interest a development constraint?

Yes, there are constraints
Archeology is anticipated to be a constraint - investigations/surveys to be undertaken accordingly.

Is noise or pollution from neighbouring uses a development constraint?

No answer given
No answer given

Are there any other development constraints relating to the built environment?

Yes, there are constraints
- development to be set back from the river wall flood defence installed
- sufficient distance required by Network Rail
- existing leases and rights of access to the Medway Control Bunker and SECAMB building

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
Land leased to SECAMB for use of sleeping accommodation.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No answer given
No answer given

Are there any other legal constraints?

No answer given
No answer given

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

No answer given

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

It is anticipated by the end of 2023.

What would the anticipated lead-in time be to starting construction?

6 months from planning consent subject to market conditions, pre commencement conditions and disposal.

What would be the anticipated annual build-out rate?

Unknown

How many years would construction take to complete the development?

3-years.

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No answer given
No answer given

Is the landscape character a development constraint?

Yes, there are constraints
There are view points from All Saints Church to consider.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

Yes, there are constraints
An updated modelling exercise needs to be undertaken to understand the quantum of homes that could be delivered for vehicles at key junctions and what improvements could be required or be feasible.

Is a public right of way a development constraint?

Yes, there are constraints
Parts of the existing Public Rights of Way are to be extinguished as the newly constructed road and footpath network is maintained by Highways.

Is land contamination a development constraint?

No answer given
No answer given

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
Consideration of views from and to All Saints Church.

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No answer given
No answer given

Are there any other development constraints relating to the built environment?

No answer given
No answer given

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
The Riverside Tavern public house will remain in situ and will not form part of the redevelopment plans.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No answer given
No answer given

Are there any other legal constraints?

Yes
There is a Funding Agreement in place with Homes England. Funds were used to CPO parcels of land. Negotiation to amend the clauses are ongoing.

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Not known

Timescale for delivery

Are there any viability issues which would affect the development?

Yes

When would a planning application be submitted?

Within a 5 year period, subject to market changes.

What would the anticipated lead-in time be to starting construction?

12 months.

What would be the anticipated annual build-out rate?

Dependent on delivery strategy.

How many years would construction take to complete the development?

Unknown.

Please indicate the approximate timescale for delivery:

Within 6 to 10 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No answer given
No answer given

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No answer given
No answer given

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Jun-23

What would the anticipated lead-in time be to starting construction?

12 months from receipt of planning permission

What would be the anticipated annual build-out rate?

15-25 per annum

How many years would construction take to complete the development?

2 Years

Please indicate the approximate timescale for delivery:

Within 5 years

Current planning permission(s), including reference numbers:

No answer given

Other relevant planning history:

Immediately to the south of the site is land with consent via outline planning permission and subsequent reserved matters consent for the construction of 184 dwellings, which is currently being built out by Redrow Homes. To the east of the site is an area of land which has a linked planning permission for an area of allotments, open space and drainage infrastructure which will be delivered to serve that consented 184 unit scheme.

Proposed development

What is the proposed land use?

General industry (Class B2): *Not selected*

Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*

Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*

Please describe the proposed use: *n/a*

Residential institution (Class C2): *Not selected*

Please describe the proposed use: *n/a*

Secure residential institution (Class C2a): *Not selected*

Please describe the proposed use: *n/a*

Dwellings (Class C3): ***Selected***

Minimum number of dwellings: *45*

Maximum number of dwellings: *45*

Self build and custom build: *Not selected*

Minimum number of dwellings: *n/a*

Maximum number of dwellings: *n/a*

Gypsy, Traveller and travelling showpeople pitches/plots: *Not selected*

Number of pitches/plots: *n/a*

House in multiple occupation (Class C4): *Not selected*

How many tenants would occupy the dwelling? *n/a*

Commercial, business and service (Class E): *Not selected*

Please describe the proposed use: *n/a*

Learning and non-residential institution (Class F1): *Not selected*

Please describe the proposed use: *n/a*

Local community use (Class F2): *Not selected*

Please describe the proposed use: *n/a*

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: *Not selected*

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Option holder/conditional contract

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Site is under option to a developer

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Within one month.

What would the anticipated lead-in time be to starting construction?

6-9 months.

What would be the anticipated annual build-out rate?

50 dwellings per year.

How many years would construction take to complete the development?

1

Please indicate the approximate timescale for delivery:

Within 5 years

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No answer given
No answer given

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

ASAP - positive pre app held.

What would the anticipated lead-in time be to starting construction?

as soon as conditions are discharged. ASAP

What would be the anticipated annual build-out rate?

08-Oct

How many years would construction take to complete the development?

1 or 2

Please indicate the approximate timescale for delivery:

Within 5 years

Site ID: SR15

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No answer given
No answer given

Is the landscape character a development constraint?

No answer given
No answer given

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No answer given
No answer given

Is a tree or hedgerow a development constraint?

No answer given
No answer given

Is a tree preservation order a development constraint?

No answer given
No answer given

Is flooding a development constraint?

Yes, there are constraints
Site partially in flood zone. This only covers perhaps 5% of the site. Development can be sited around the site and this area retained for SuDs

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

Yes

Market interest

What is the market interest in the site?

Enquiries received

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

Once site is allocated in Local Plan

What would the anticipated lead-in time be to starting construction?

12 months from receipt of planning permission

What would be the anticipated annual build-out rate?

15-25 per annum

How many years would construction take to complete the development?

2 Years

Please indicate the approximate timescale for delivery:

Within 5 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
There would be some adverse effects on local landscape character (as is largely inevitable for any development of a green field site). However, this harm would be at a relatively low level, would be felt over a limited area around the site and would reduce further over time. Please see attached cover letter for further details.

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

Yes, there are constraints
A Public Right of Way (PRoW) runs through the site. Nevertheless, efforts have been made in the design of the site so that any impact on the PRoW is minimal, and it can be utilised as a main access road. Visual impact would be inevitable as part of a development of the site.

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
The site is within the Frinsbury and Manor Farm Conservation Area. The proposal can be designed in acceptable way

such as to protect those features and buildings that contribute positively to the CA.

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
Manor Farm is located to the west of the site, which comprises of three listed buildings: Manor Farm Oast (Grade II),

The Manor House (Grade II) & Barn 30 yards south west of the Manor House (Grade I).

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No answer given
No answer given

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
Flood zone 3, but there are flood defences on the western boundary, see accompanying letter for more information

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
Within the setting of the Historic Rochester Conservation Area and significant listed buildings but this is not viewed as a fundamental constraint, please see accompanying letter for more information

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
None on the site itself but the setting of the listed buildings in the wider vicinity would need to be considered

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

Yes, there are constraints
See accompanying letter

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

No answer given

What would the anticipated lead-in time be to starting construction?

No answer given

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

No answer given

Please indicate the approximate timescale for delivery:

Within 11 to 15 years

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

Yes, there are constraints
site is within the Hogmarsh Valley Character Area Area of Local Landscape Interest

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

Yes, there are constraints
Odour plume from nearby sewer treatment plant means there will be no development within the odour plume area.

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

No answer given

Other relevant planning history:

Site is located on Medway City Estate and there is no record of planning applications on Medway Council planning register for the original construction of the buildings. We have correspondence between Rochester upon Medway City Council and Geoffrey Thorpe Practice (Architect), dated 20th December 1988, confirming that the proposals "comply with the general conditions, limitations and exclusions applying throughout the designated Enterprise Zones." In addition, we have further correspondence between the afore-mentioned architect and the Council, dated 22nd March 1989 and a response from the Council, dated 28th March 1989, confirming no objection to the amendment to the proposal.

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
Mainly Flood Zone 1, eastern edge in Flood Zone 2 but there are flood defenses on the eastern boundary, see accompanying letter for more information

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
Within the setting of the Dockyard Conservation Area and significant listed buildings but this is not viewed as a fundamental constraint, please see accompanying letter for more information

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
None on the site itself but the setting of the listed buildings in the wider vicinity would need to be considered

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

No answer given

What would the anticipated lead-in time be to starting construction?

No answer given

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

No answer given

Please indicate the approximate timescale for delivery:

Within 11 to 15 years

Site ID: SR38

Form submission ID: 195

Respondent ID: 348

Supplementary information submitted: No

Existing site

Site name: *Land on east side of Neptune Close, Rochester - K776597*

Site address: *Land on east side of Neptune Way, Rochester, ME2 4NA*

Type of site: *Brownfield - previously developed land*

What is the current land use of the site?

General industry (Class B2): *Not selected*

Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): ***Selected***

Gross internal area (sqm): *3800*

Hotel (Class C1): *Not selected*

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

Yes, there are constraints
Within the setting of the Dockyard Conservation Area and significant Listed Buildings, but this isn't viewed as a fundamental constraints and one which would be addressed by appropriate development- see accompanying letter

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
Within the setting of a number of listed buildings but this isn't viewed as a fundamental constraint and one which can be addressed by appropriate development

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

Yes, there are constraints
Please see accompanying letter

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

Yes
There are existing tenancies within the building but those would not be a fundamental constraint to the development of the site within an appropriate delivery timescale.

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Proposed development

What is the proposed land use?

General industry (Class B2): ***Selected***

Gross internal area (sqm): *2000*

Storage and distribution (Class B8): ***Selected***

Gross internal area (sqm): *2000*

Hotel (Class C1): ***Not selected***

Please describe the proposed use: *n/a*

Residential institution (Class C2): ***Selected***

Please describe the proposed use: *Retirement homes*

Secure residential institution (Class C2a): ***Not selected***

Please describe the proposed use: *n/a*

Dwellings (Class C3): ***Selected***

Minimum number of dwellings: *20*

Maximum number of dwellings: *50*

Self build and custom build: ***Selected***

Minimum number of dwellings: *20*

Maximum number of dwellings: *29*

Gypsy, Traveller and travelling showpeople pitches/plots: ***Selected***

Number of pitches/plots: *50*

House in multiple occupation (Class C4): ***Not selected***

How many tenants would occupy the dwelling? *n/a*

Commercial, business and service (Class E): ***Not selected***

Please describe the proposed use: *n/a*

Learning and non-residential institution (Class F1): ***Not selected***

Please describe the proposed use: *n/a*

Local community use (Class F2): ***Not selected***

Please describe the proposed use: *n/a*

Minerals supply: ***Not selected***

Please describe the proposed use: *n/a*

Waste management: ***Not selected***

Please describe the proposed use: *n/a*

Other / Sui generis: ***Not selected***

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No answer given
No answer given

Is the landscape character a development constraint?

No answer given
No answer given

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No answer given
No answer given

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

No answer given

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

No answer given

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

Enquiries received

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

2024

What would the anticipated lead-in time be to starting construction?

9 months

What would be the anticipated annual build-out rate?

20 units p.a.

How many years would construction take to complete the development?

2 years including lead in time

Please indicate the approximate timescale for delivery:

Within 5 years

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No answer given
No answer given

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No answer given
No answer given

Are ecological designations a development constraint?

No answer given
No answer given

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the natural environment?

No answer given
No answer given

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No answer given
No answer given

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

No, there are not constraints
n/a

Is archaeological interest a development constraint?

No answer given
No answer given

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No answer given
No answer given

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No answer given
No answer given

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No answer given
No answer given

Are there any other legal constraints?

No answer given
No answer given

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

No answer given

What would the anticipated lead-in time be to starting construction?

No answer given

What would be the anticipated annual build-out rate?

No answer given

How many years would construction take to complete the development?

No answer given

Please indicate the approximate timescale for delivery:

Within 5 years, Within 6 to 10 years

Site ID: SR49
Form submission ID: 214
Respondent ID: 380
Supplementary information submitted: Yes

Existing site

Site name: *Shaftesbury House*
Site address: *Upnor Road, Upnor*
Type of site: *Brownfield - previously developed land*

What is the current land use of the site?

General industry (Class B2): *Not selected*
Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*
Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*
Please describe the current use: *n/a*

Residential institution (Class C2): *Not selected*
Please describe the current use: *n/a*

Secure residential institution (Class C2a): *Not selected*
Please describe the current use: *n/a*

Dwellings (Class C3): *Not selected*
Number of dwellings: *n/a*

Gypsy, Traveller and travelling showpeople pitches/plots: *Not selected*
Number of pitches/plots: *n/a*

House in multiple occupation (Class C4): *Not selected*
How many tenants occupy the dwelling? *n/a*

Commercial, business and service (Class E): *Not selected*
Please describe the current use: *n/a*

Learning and non-residential institution (Class F1): *Not selected*
Please describe the current use: *n/a*

Local community use (Class F2): *Not selected*
Please describe the current use: *n/a*

Minerals supply: *Not selected*
Please describe the current use: *n/a*

Waste management: *Not selected*
Please describe the current use: *n/a*

Other / Sui generis: ***Selected***
Please describe the current use: *Dwelling and former leisure facilities*

Vacant / Cleared of structures / Inactive: *Not selected*
Please provide further information: *n/a*

Current planning permission(s), including reference numbers:

No answer given

Other relevant planning history:

No answer given

Proposed development

What is the proposed land use?

General industry (Class B2): *Not selected*

Gross internal area (sqm): *n/a*

Storage and distribution (Class B8): *Not selected*

Gross internal area (sqm): *n/a*

Hotel (Class C1): *Not selected*

Please describe the proposed use: *n/a*

Residential institution (Class C2): *Not selected*

Please describe the proposed use: *n/a*

Secure residential institution (Class C2a): *Not selected*

Please describe the proposed use: *n/a*

Dwellings (Class C3): ***Selected***

Minimum number of dwellings: 6

Maximum number of dwellings: 15

Self build and custom build: *Not selected*

Minimum number of dwellings: *n/a*

Maximum number of dwellings: *n/a*

Gypsy, Traveller and travelling showpeople pitches/plots: *Not selected*

Number of pitches/plots: *n/a*

House in multiple occupation (Class C4): *Not selected*

How many tenants would occupy the dwelling? *n/a*

Commercial, business and service (Class E): *Not selected*

Please describe the proposed use: *n/a*

Learning and non-residential institution (Class F1): *Not selected*

Please describe the proposed use: *n/a*

Local community use (Class F2): *Not selected*

Please describe the proposed use: *n/a*

Minerals supply: *Not selected*

Please describe the proposed use: *n/a*

Waste management: *Not selected*

Please describe the proposed use: *n/a*

Other / Sui generis: *Not selected*

Please describe the proposed use: *n/a*

Natural constraints

Please indicate if any of the following natural constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Are the ground conditions a development constraint?

No, there are not constraints
n/a

Is the landscape character a development constraint?

No, there are not constraints
n/a

Is the agricultural land grading (please indicate if grade 1, 2 or 3a) a development constraint?

No, there are not constraints
n/a

Are ecological designations a development constraint?

No, there are not constraints
n/a

Is a tree or hedgerow a development constraint?

No, there are not constraints
n/a

Is a tree preservation order a development constraint?

No, there are not constraints
n/a

Is flooding a development constraint?

Yes, there are constraints
Part Zone 2/3

Are there any other development constraints relating to the natural environment?

No, there are not constraints
n/a

Built environment constraints

Please indicate if any of the following built environment constraints could affect the development of the site. If yes, please provide further details, including mitigation.

Is access to the site a development constraint?

No, there are not constraints
n/a

Is a public right of way a development constraint?

No, there are not constraints
n/a

Is land contamination a development constraint?

No, there are not constraints
n/a

Is a pipeline a development constraint?

No, there are not constraints
n/a

Are overhead cables a development constraint?

No, there are not constraints
n/a

Is a conservation area designation a development constraint?

No, there are not constraints
n/a

Is a listed building or a listed structure a development constraint?

Yes, there are constraints
Site is adjacent to listed structures.

Is archaeological interest a development constraint?

No, there are not constraints
n/a

Is noise or pollution from neighbouring uses a development constraint?

No, there are not constraints
n/a

Are there any other development constraints relating to the built environment?

No, there are not constraints
n/a

Legal constraints

Please indicate if any of the following legal constraints could affect the development of the site. If yes, please provide further details, including any actions required.

Are there unresolved multiple ownership constraints?

No
n/a

Are there tenancy constraints?

No
n/a

Are there ransom strip constraints?

No
n/a

Are there covenant constraints?

No
n/a

Are there any other legal constraints?

No
n/a

Utilities

Please indicate if any of the following utilities are available to the site:

Is mains water supply available to the site?

Yes

Is mains sewerage supply available to the site?

Yes

Is an electrical supply available to the site?

Yes

Is a gas supply available to the site?

Yes

Is a public highway connection available to the site?

Yes

Is a landline telephone / broadband internet connection available to the site?

Yes

Land ownership

What is your/your client’s interest in the land?

Sole owner

Have the owners of all parts of the site indicated support for its development?

Yes

Is there a housebuilder/developer involved in the site?

No

Market interest

What is the market interest in the site?

None

Timescale for delivery

Are there any viability issues which would affect the development?

No

When would a planning application be submitted?

12 months

What would the anticipated lead-in time be to starting construction?

12 months

What would be the anticipated annual build-out rate?

15

How many years would construction take to complete the development?

1

Please indicate the approximate timescale for delivery:

Within 5 years

Appendix C

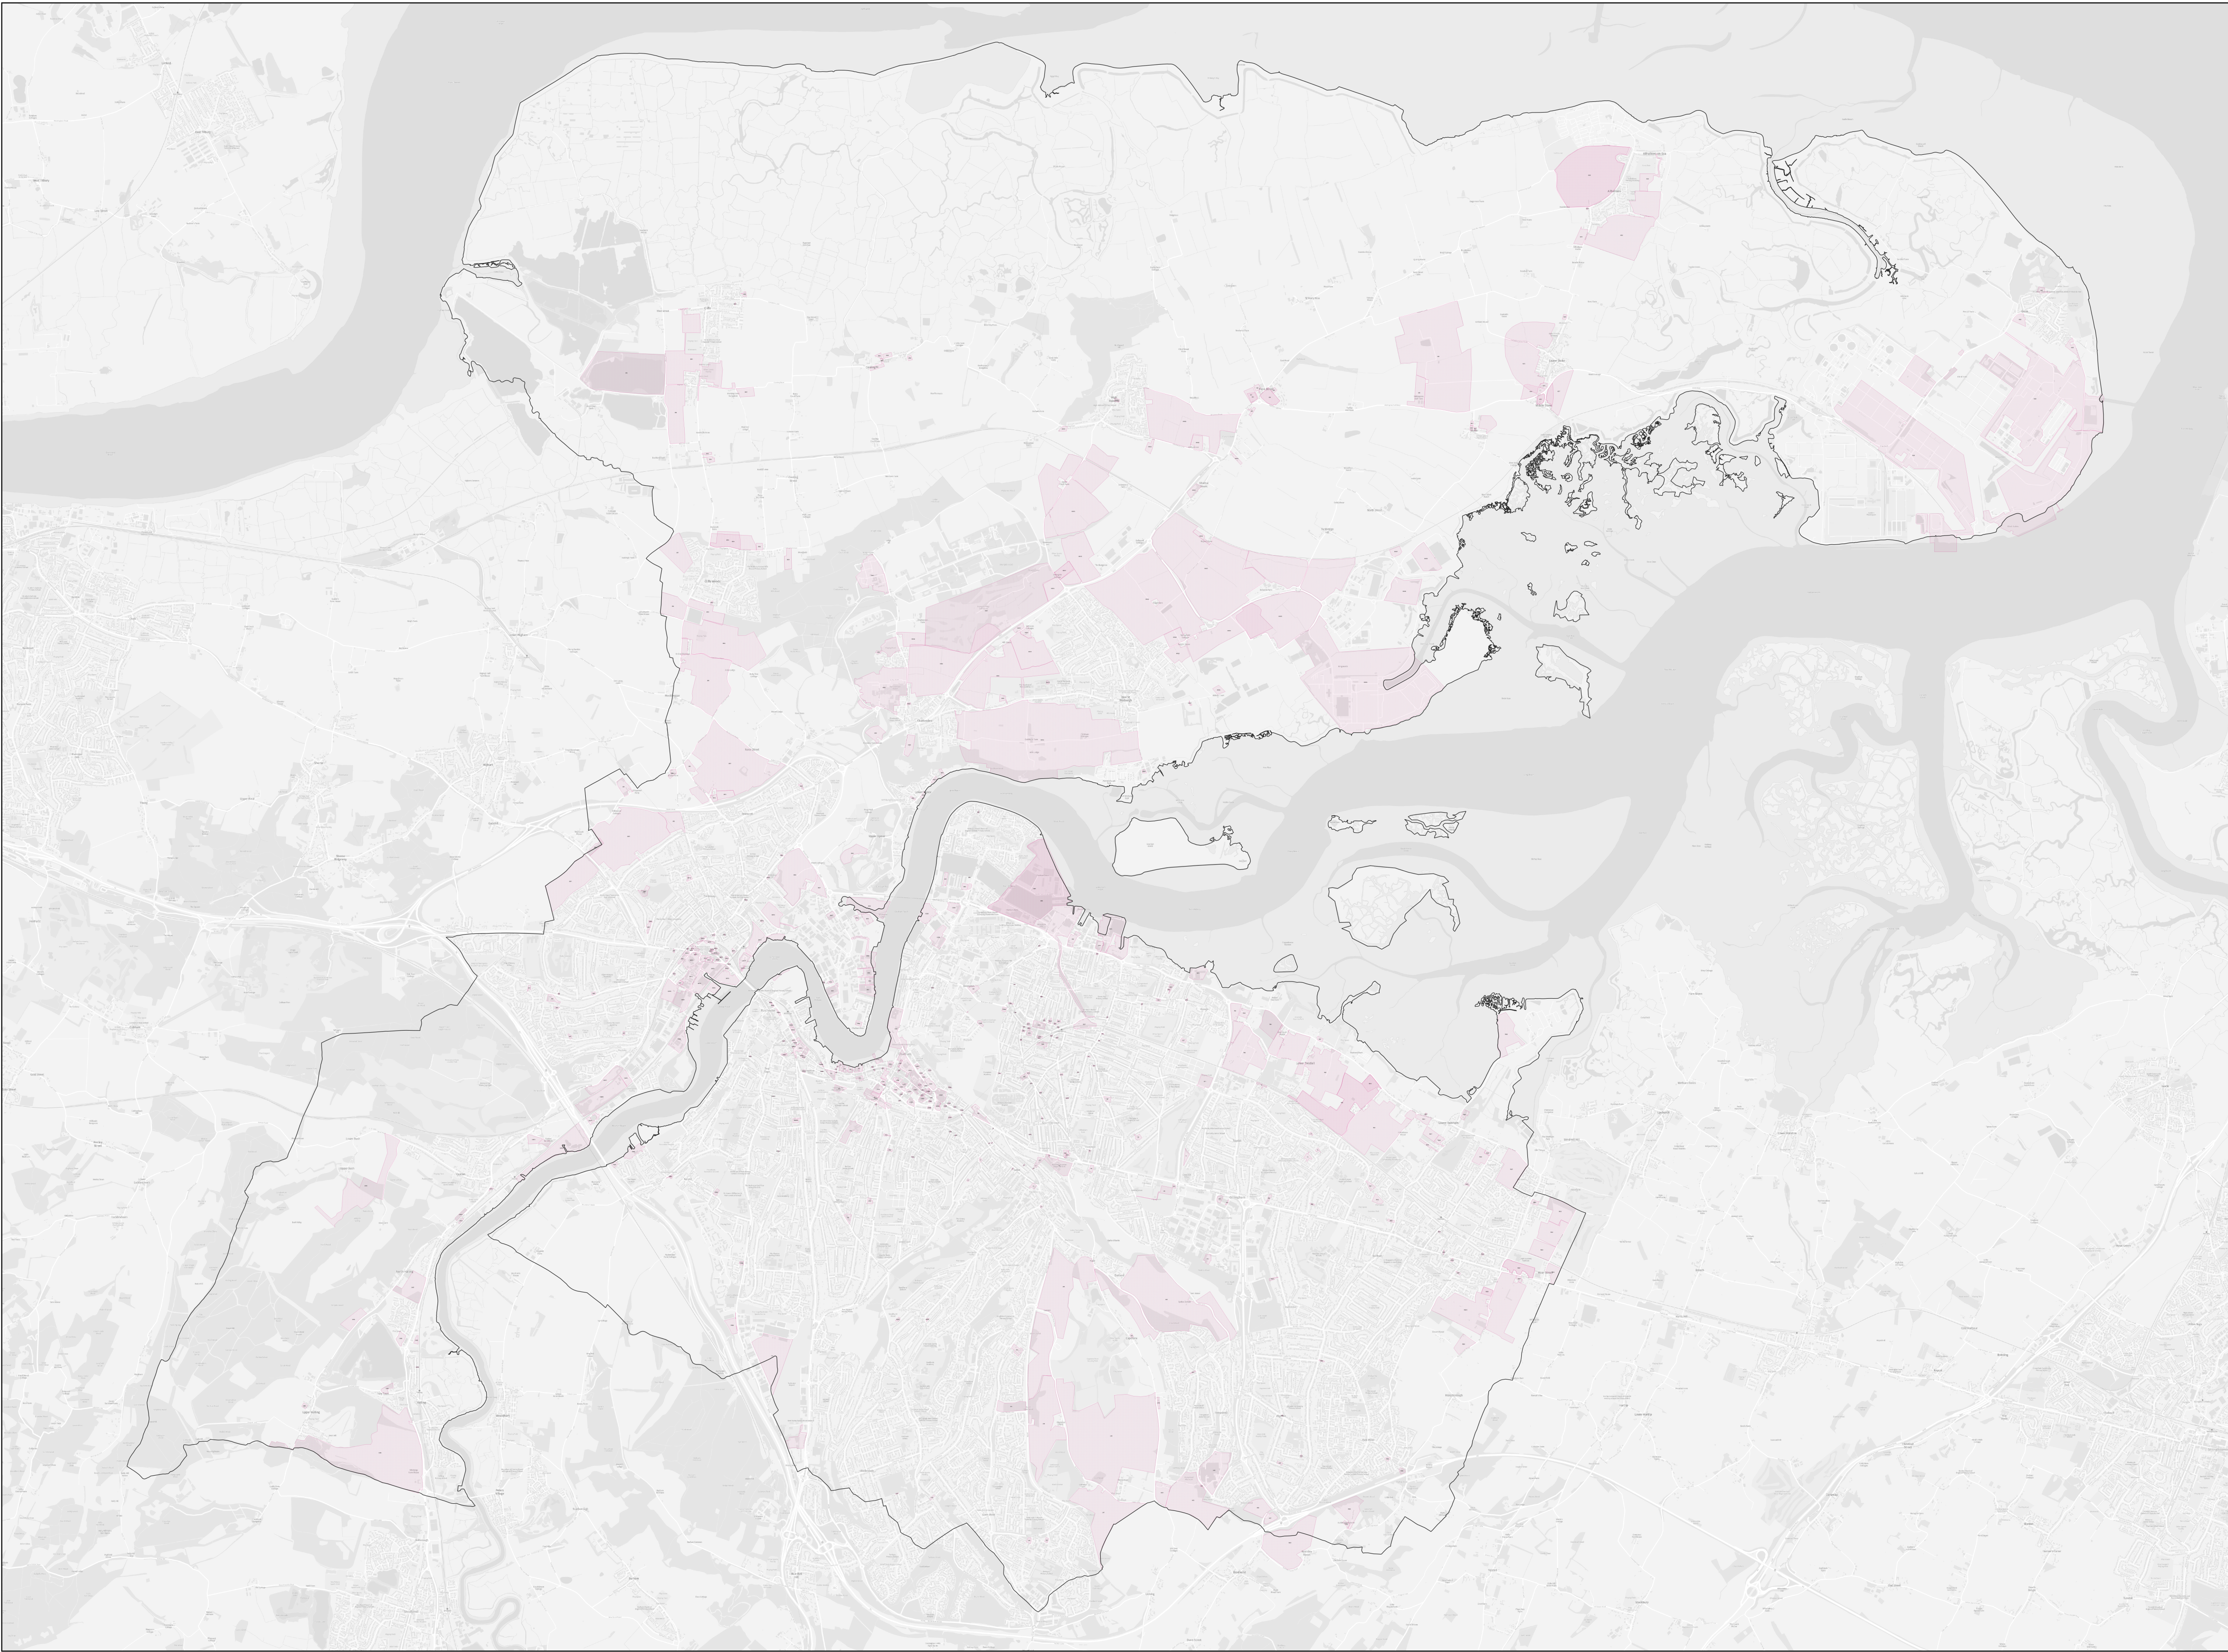

Map of Stage 1 Sites

In total, 462 sites were identified, although in some instances alternative submissions for the same site were received through the call for sites.

Each site has been assigned an identification reference for use in the LAA. This is based on an abbreviation of the electoral ward and its location relative to other sites for ease of navigation on a map.

All 462 sites are shown on a map at Appendix C.

Map of Stage 1 Sites

Version 1 (500 dpi)

Appendix D

Stage 1 Initial Survey

An initial survey of each site is presented at Appendix D, which includes bookmarks by LAA Site ID.

Appendix E

Stage 2 Site Assessment

Stage 2 involved estimating the development potential and an assessment as to the suitability, availability and achievability of each site. This involved a planning officer's judgement about overcoming site-specific constraints.

Each site assessment is presented at Appendix E, which includes bookmarks by LAA Site ID.

Notes

Appendix F

Residential Typologies

Residential typologies were used to estimate the development potential of each site.

The residential typologies are presented at Appendix F; this is an extract from the 2019 'Stood Town Centre Masterplan' by Allies and Morrison on behalf of Medway Council.

MEWS HOUSES

Intimate, low-rise style, with private front doors alternating with garage doors. Flexible options to cater to a variety of needs and lifestyles; usually potential to add a low-profile third storey as required in the future.

35-55 dph

TERRACE / TOWNHOUSES

Interchangeable between wheelchair accessible and typical three and four bed homes allows for variation in unit types along any given street; while at the same time maintaining the desired character of the building fabric.

50-80 dph

STACKED MAISONNETTES

Interchangeable between wheelchair accessible and typical floor plans, terraced apartments can cater to many needs. Lower-levels can form maisonettes with private entrances or shops; whilst upper level apartments can have private terraces and balconies.

50-125 dph

LINEAR APARTMENT BLOCK

Interchangeable between wheelchair accessible and typical floor plans, linear apartment blocks can cater to many needs. Apartments can be organised on one floor or stacked across two. Apartment blocks can flexibly accommodate work space at ground floor, with residential above.

100 - 150 dph

CENTRAL APARTMENT BLOCK

Central apartment blocks can accommodate a range of uses and are likely to be 3-6 storeys in height. Apartments can be organised on one floor or stacked across two. Apartment blocks may include more than one storey of commercial use from the ground floor and separate entrances would be required for commercial and residential elements.

200+ dph

MIXED USE BIG BOX RETAIL AND RESIDENTIAL

A large block containing supermarket or other large floorplate retail at the ground floor, with residential uses above. Separate entrances would be provided for the retail, for residential properties, and for servicing. Car parking could be pooled between the retail and the residential. As with apartment blocks, work space could also be accommodated within the overall block.

200+ dph

Appendix G

Site-specific Annual Housing Trajectory

A site-specific, annual housing trajectory is presented at Appendix G.
